#### 2 INTRODUCTION

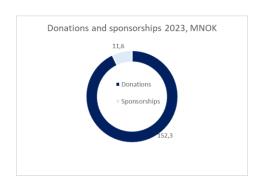

### 2.1 Sustainability strategy

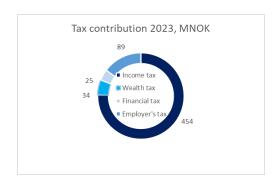

Sparebanken Sør's mission is to "create sustainable growth and development for our region". The bank is a regional savings bank and its business model is an integrated value chain that comprises the development, production and provision of financial products and services. The distribution of products through owner companies and partners is also an important part of the business model, and we serve customers through a combination of physical sales offices and digital solutions. Our main business areas are Deposits and Lending to the retail and corporate markets, as well as Financing and Investment. These business areas, together with procurement, are where we have the greatest positive and negative impact on areas that affect sustainability. These areas also represent the greatest risks and opportunities in relation to the bank's financial position and results. For more information on the size of these business areas, please refer to the Annual Report.

Our business activities are conducted within the framework of the company's strategy, corporate governance, Code of Conduct, governing documents, guidelines and procedures, all in accordance with regulatory framework conditions. A number of indicators (KPIs) have been established, with short and long-term goals in the relevant material topics. Continuous follow-up of these indicators, together with other analyses and assessments, form the basis for monitoring development and target attainment and are used to ensure compliance with strategies, guidelines, due diligence and objectives.

As a savings bank, we have a long tradition of being a responsible corporate citizen. Our work on sustainability (ESG – Environmental, Social and Governance), which encompasses the climate and nature, social conditions and corporate governance, is a natural continuation of the role that we have played for almost 200 years. For us, sustainable development means that we should contribute to positive development in ESG, while safeguarding our social responsibility in the areas in which we operate. Our work on sustainability should strengthen our competitiveness and reduce the bank's ESG risk. As an employer, investor, lender and supplier of financial products and services, we should contribute to sustainable growth and development by strengthening the positive effects and reducing the negative impacts on people, society, climate and nature.

Sustainability is embedded and integrated into our overall strategic plan. We will operationalise sustainability in all business areas and contribute to solutions to the sustainability challenges facing society. We support the Paris Agreement and other relevant global and national sustainability initiatives. Our aim is to provide competitive returns to equity certificate holders and create sustainable growth and development in our region.

Through active collaboration with customers, the public sector, business, research and educational environments, we also contribute to business and community development. We contribute significant funds to a number of sports and cultural activities, societal functions and sustainable activities to stimulate sustainable development and growth in the region.

#### 2.2 Framework

#### 2.2.1 Organisation

The organisational structure for sustainability work:

ESG work is firmly embedded at Board and management level. You can find more details about organisation and responsibility in our "Sustainability Strategy" document at https://www.sor.no/globalassets/organisasjon/barekraft/sustainability-strategy-sparebanken-sor.pdf, section 3 page 6.

#### 2.2.2 Governing documents, management and measurement systems

Good governing documents and management and measurement systems are key prerequisites for sustainability work. Governing documents have been prepared at an overarching level and an operational level for each of the different topic areas. We also have a number of internal governing documents, procedures and guidelines that are not publicly available for reasons of confidentiality.

Governing documents describe management control systems for the various topics, how these are managed, and how they are followed up.

We have established KPIs for the various topics set out in Scorecard (Appendix 2). Measures for improvements are implemented as needed, and prioritised KPIs are integrated into the bank's overall risk management framework and included in quarterly reports to the Board.

Governing documents, management control systems, goals and methods are evaluated and revised through annual auditing processes. You can find an overview of our governing documents for ESG under the relevant topic or on the bank's website at https://www.sor.no/felles/om-sparebanken-sor/about/social-responsibility/sustainability-reports/

#### 2.2.3 GRI Standards (Global Reporting Initiative)

This report has been prepared according to the new GRI Standards from 2021, which comprise a recognised global system and framework for sustainability reporting (ESG).

#### 2.2.4 Scorecard and KPIs

| ESG area          | Indicator  | UNIT     | 2021  | 2022   | 2023   | Objec    | tive |
|-------------------|--|----------|-------|--------|--------|----------|------|
| ESG area          | muicator   |          | 2021  | 2022   | 2023   | Goal     | Date |
|                   | Percentage of female managers in total                         | %        | 38,9  | 37,3   | 38,6   | 40 - 60  | 202  |
|                   | Women's average pay compared to men                            | %        | 85,9  | 86,9   | ,      | 90 - 110 | 202  |
| SOCIAL            | Employee satisfaction  | %        | NA    | 85     | NA     | > 80     |      |
|                   | Uptime customer solutions, SLA                                 | %        | 99,77 | 99,64  | 99,9   | 99,70    |      |
|                   | Donations and sponsorships                                     | MNOK     | 51,7  | 111,7  | 163,9  |          |      |
|                   | Customer satisfaction indicator, retail market                 | Plass nr | 11    | 6      | 10     | Topp 3   |      |
|                   | Customer satisfaction indicator, corporate market              | Pass nr  | 7     | 7      | 7      | Topp 3   |      |
|                   | Green home mortgages, % of total                               | %        | NA*   | NA*    | 18,1   | 50       | 203  |
| CORPORATE         | Green commercial property, % of total                          | %        | NA    | NA     | 21,3   | 50       | 203  |
| GOVERNANCE        | Sustainable bonds, Liquidity portfolio                         | MNOK     | 1.495 | 3.178  | 5.619  | 2.000    | 202  |
|                   | Bond financing under Green & Sustainability Bond Framework     | MNOK     | 5.103 | 12.231 | 12.231 |          |      |
|                   | Percentage of suppliers risk classified in line with ESG       | % volum  |       | 78,3   | 80,7   |          |      |
|                   | ESG Rating (Neglectable risk is ≤ 10 points)                   | Poeng    | 11,7  | 9,7    | 10,8   | ≤ 20     |      |
|                   | Greenhouse-gas (GHG) emissions from own operations             | tonn CO2 | 254,4 | 232,2  | 253,5  |          |      |
|                   | Reductions in GHG emissions from own activities, Baseline 2017 | %        | 50,4  | 54,7   | 50,6   | 55       | 203  |
|                   | Energy intensity, own activities                               | kWh/m2   | 233   | 203    | 213    | 0 (NZE)  | 205  |

| KLIMA OG<br>NATUR | GHG emissions from lending                                     | tonn CO2 | NA    | NA     | NA     | 0 (NZE)  | 205  |
| NAIUK             | Reduction in GHG emissions from investments in 2050, BL 2023   | %        | NA    | NA     | NA     | 40       | 203  |
|                   | GHG emissions from investments                                 | %        | NA    | NA     | NA     | 0 (NZE)  | 205  |
|                   | Percentage energy from renewable sources                       | %        | 94,1  | 96,1   | 96,4   |          |      |
|                   | Company cars that are electric                                 | %        | 81    | 83     | 84     | 100      | 202  |

<sup>\*\*</sup> For definitions of KPIs, see Appendix 2 Scorecard Definitions

An overview of all the bank's KPIs is presented in Appendix 2 to this report.

#### 2.3 Initiatives

### 2.3.1 UN Global Compact

Sparebanken Sør has endorsed the UN Global Compact. The Global Compact is the world's largest initiative for work on sustainability and corporate social responsibility, and we publish a Communication on Progress (CoP) annually, which includes the status and development of our work on sustainability and Sustainable Development Goals.

# 2.3.2 UNEP FI PRB (United Nations Environment Programme Finance Initiative – Principles for Responsible Banking)

The UN Principles for Responsible Banking are a guide that describes responsibilities and ambitions for actions to meet the UN Sustainable Development Goals and the targets of the Paris Agreement.

Sparebanken Sør is a signatory to UNEP PRB. For more information on how the bank integrates UNEP PRB principles, see:

https://www.sor.no/globalassets/organisasjon/barekraft/2022-reporting-self-assessment-template-sparebanken-sor.pdf

# 2.3.3 UNEP FI PRI (UN Environmental Programme Finance Initiative – Principles for Responsible Investment)

Sparebanken Sør outsources its asset management operations and is therefore not a signatory to UNEP PRI. We distribute securities funds from other fund managers and require these to be members of UNEP PRI and to comply with its principles.

# 2.3.4 Finance Norway's "Roadmap for Green Competitiveness in the Norwegian Financial Sector"

Finance Norway has prepared a roadmap for green competitiveness in the financial sector with a vision for the financial services industry to be profitable and sustainable by 2030. We are involved in a continuous process of integrating these principles into our strategic and operational processes.

#### 2.3.5 UN Sustainable Development Goals

The UN Sustainable Development Goals, which were adopted in 2015, represent a global plan to eradicate poverty, combat inequality and stop climate change. We support all 17 Sustainable Development Goals and have identified certain goals that will have special priority. Prioritised sustainability goals, important measures and activities are shown in the figure below.

Further details about measures and activities for supporting prioritised sustainability goals appear under the relevant topic in point 2.4.

#### 2.3.6 TCFD (Task Force on Climate-related Financial Disclosures)

TCFD is a supplement to our Sustainability Report and our overall reporting of sustainability. The TCFD report provides a framework for our climate reporting, see:

https://www.sor.no/globalassets/organisasjon/barekraft/2022-tcfd-report-sparebanken-sor.pdf

#### 2.3.7 TNFD (Task Force on Nature-related Financial Disclosures)

The TNFD is a supplement to our Sustainability Report and our overall reporting of sustainability. The TNFD report provides a framework for our nature reporting, see:

https://www.sor.no/globalassets/organisasjon/barekraft/2023-07-05-tnfd-report-sparebanken-sor.pdf

#### 2.3.8 PCAF (Partnership for Carbon Accounting Financials)

In 2021, Sparebanken Sør became a partner in the PCAF, which is a global collaboration between financial institutions that are working together to harmonise assessments of and information on greenhouse gas emissions financed by loans and investments. The group is rapidly growing and consists of a large number of banks and investors from around the world.

#### 2.3.9 ESG Rating

In 2023, we received an ESG rating from Sustainalytics of 10.8 (corresponding to negligible risk). See below for more details.

#### 3 STAKEHOLDER ENGAGEMENT AND MATERIALITY ANALYSIS

# 3.1 Stakeholder engagement and materiality analysis

Sustainability is about long-term value creation, both for society and for the company in question. The significance of the various sustainability topics for the company and the industry in general will vary. Each company must prioritise those sustainability topics that are most important for its operations. These analyses are called "double materiality analyses".

A materiality analysis is an established tool for identifying sustainability topics that are significant to a company's long-term value creation and impact on society and the environment. The principle of double materiality is central to the most important international reporting standards, such as the CSRD (Corporate Sustainability Reporting Directive), and is an established element of best practices in sustainability.

In the autumn of 2022, we updated our stakeholder and materiality analysis. The purpose of this was to:

- quality-assure material topics
- follow the principle of double materiality

The process is described in the following sections.

## 3.2 Stakeholder survey

Stakeholders are selected on the basis of business relationships, their expertise on sustainability, and their significance to society and the bank's business areas. When selecting stakeholders, we have also focused on selecting a sufficient number of stakeholders with good knowledge of industry and sustainability, and who can be defined as experts.

The stakeholder survey was conducted as a questionnaire with follow-up discussions with selected stakeholders. The figure below shows which stakeholder groups were given priority in the selection process.

We assess relevant and potential new stakeholders on an ongoing basis. The stakeholder groups are important because they can influence and provide input on how the bank can prioritise work on sustainability in terms of the choice of topics, measures and priorities.

# 3.3 Stakeholder engagement

The objective of stakeholder engagement is to obtain input on what stakeholders believe are material sustainability topics that the bank should prioritise from a societal and business perspective.

Information about key stakeholders:

| Stakeholders         | Arena for dialogue  | Regularly | Annually | As needed | Relevant topics                  | Measures                         |
|----------------------|---------------------|-----------|----------|-----------|----------------------------------|----------------------------------|
| Customers (retail    | Customer            |           |          |           | Products, services and prices.   | Sustainable products. ESG in     |
| customers and        | meetings, events,   |           |          | Х         | Digital solutions. Responsible   | customer dialogue and credit     |
| corporate customers) | customer surveys    |           |          |           | business conduct.                | processes.                       |

The process of identifying and engaging stakeholders and integrating their input into decision-making processes that concern them is ongoing.

# 3.4 Materiality analysis

To ensure that the bank prioritises the most material topics and takes double materiality into account, the materiality analysis was updated in autumn 2022.

The analysis is based on the principle of double materiality. Double materiality means analyses of how risks and opportunities in relation to ESG affect our financial position and our performance (financial materiality), and what positive and negative impact the bank has on ESG in relation to society and the environment (environmental and social materiality).

The update of the materiality analysis involved a wide range of our key stakeholders, including owners, customers, employees, authorities and society at large. We conducted a survey that was followed up by indepth discussions with representatives from the stakeholder groups.

A workshop was held with Group Management to assess which sustainability topics are of greatest importance to us, and to prioritise these.

The selection of sustainability topics was based on dialogue with consultants, as well as various internal and external sources such as the SASB Materiality Map.

The materiality analysis resulted in an overview of those topics that are material to us. These reflect what our stakeholders are concerned about, what has the greatest financial significance for Sparebanken Sør, and the greatest social impact.

The most material topics show where we have influence, either directly in our own operations or indirectly through the business areas represented by our customers, suppliers and partners.

Some of the topics, such as climate and nature, are key to our financial risk and opportunities, including, for example, sustainable products, bonds and investments. These are the most important instruments we have for achieving the objectives of the Paris Agreement and the forthcoming UN Biodiversity Agreement. A common feature of the topics that provide us with business opportunities is that they affect our customers, primarily in the business areas of Lending, Investments and Financing.

Other topics such as money laundering, financial crime, data protection and information security are important for safeguarding regulatory and social conditions. Topics related to social conditions, such as labour and human rights and the development of employees, are important for safeguarding and developing individuals both in society at large and at the bank, as they help ensure fair and sustainable value creation and economic development.

Below is a list of our most material topics and key business areas in terms of sustainability.

#### 4 LABOUR AND HUMAN RIGHTS

#### 4.1 General information

Labour and human rights are an important issue because providing equal rights and opportunities for all, both internally at the bank and in society at large, helps to ensure sound and fair economic development and growth both nationally and globally.

The bank has a positive actual and potential impact on gender equality, fair pay, diversity, further development of employees, health, safety and the environment, and it is a requirement that everyone with whom the bank interacts complies with key UN conventions on labour and human rights. Similarly, we could have a negative impact by not attending to these areas in a responsible manner. The bank has not been directly associated with any negative incidents related to labour and human rights. The biggest potential social impact is in the business areas.

We follow up these topics with relevant measures to enhance the positive impact and reduce the negative impact. Short and long-term KPIs have been established in order to monitor and measure results and develop measures for key indicators.

We have governing documents, policies and guidelines that show what requirements the bank sets and how the bank works with this topic in relevant business areas.

# 4.2 The Norwegian Transparency Act

This section reports on how we deal with the Norwegian Transparency Act internally.

We have included a brief summary of our work with the Norwegian Transparency Act in this section. A full report can be found on our website. Our website also contains more detailed information about governing documents and the bank's work with the Norwegian Transparency Act, see https://www.sor.no/felles/omsparebanken-sor/about/social-responsibility/norwegian-transparency-act/

The Norwegian Transparency Act deals with labour and human rights.

Key points of the Act are:

- Section 4 Duty to carry out due diligence
- Section 5 Duty to account for due diligence
- Section 6 Right to information

The bank carries out a risk analysis (due diligence) of selected conventions relating to labour and human rights.

| Risk analysis labour and human rights   |   |             |             |             | RISK        |  |  |  |  |
|---|---|-------------|-------------|-------------|-------------|--|--|--|--|
| Risk and focus areas  | Theme of the assessment   | Consequence | Probability | Risk factor | Risk        |  |  |  |  |
| Risk of violations of equality between genders, including equal pay for work of equal value.                | See e.g. UN Convention no. 100 on equal pay for male and female employees of equal value and UN Convention no. 156 on equal opportunities and equal treatment of women and men  1. Figures for women's pay compared to men's in NOK and %  2. Figures for proportion of women/women in management/women on the                                  | 2           | 2           | 2,0         | Low risk    |  |  |  |  |
| Risk of discrimination regardless of reason.  | See e.g. UN Convention no. 111 on discrimination in employment and occupation.  1. Number of incidents/notifications of discrimination  | 2           | 2           | 2,0         | Low risk    |  |  |  |  |
| Risk of violations of right to social security  | See e.g. UN Convention no. 102 on minimum standards for social security   | 1           | 1           | 1,0         | Low risk    |  |  |  |  |
| Risk of unsatisfactory number of female managers  | 1. Proportion of female managers at various levels  | 2           | 3           | 2,4         | Medium risk |  |  |  |  |
| Risk of violations of the freedom of association and the right to organise.                                 | See e.g. UN Convention no. 87 on the freedom of association and the right to organise  1. Are the employees unionised? Which union?  2. Freedom of association and right to organise  | 1           | 1           | 1,0         | Low risk    |  |  |  |  |
| Good opportunities for professional and personal development  | See e.g. Chapter 4 of the Norwegian Working Environment Act concerning the employer's duty to facilitate professional and personal development through the employee's work, see Section 4-2(2)(a), and UN Convention 195 on the development of human resources, education, training and lifelong learning  1. Competence development programmes | 2           | 2           | 2,0         | Low risk    |  |  |  |  |
| Risk of violations of good and safe working conditions, health, safety and the environment in the workplace | See e.g. UN Convention no. 155 on health and safety in the working environment  1. Does the company have HSE manuals or procedures?   | 2           | 2           | 2,0         | Low risk    |  |  |  |  |
|   |   | 1           | 1           | 1,0         | Low risk    |  |  |  |  |
| to working hours  | 1. Scheduled and overtime hours   |             |             | <u> </u>    |             |  |  |  |  |
| Risk of unsatisfactory diversity in the bank  | Diversity programme     Recruitment strategy. 3. Trainee/apprenticeship scheme  | 2           | 3           | 2,4         | Medium risk |  |  |  |  |
| Risk of violations of fair pay  | See e.g. UN Convention no. 26 on setting a minimum wage, UN Convention no. 95 on securing employees' wages.  1. Wage statistics   | 1           | 1           | 1,0         | Low risk    |  |  |  |  |
| Accumulated risk  |   |             |             | 1,7         |             |  |  |  |  |

The results of the analysis show that Sparebanken Sør has a low risk of labour and human rights violations. In a couple of areas, the proportion of female managers and diversity, the bank has medium risk. Measures have been taken in both these areas, resulting in positive development. Accumulated risk is low risk.

There have been no violations of labour and human rights.

Although the bank's risk of violations of labour and human rights is low, we are still focusing on development and improvement in several areas. We have established a joint action plan for initiatives related to labour and human rights, and for measures relating to the bank's duty to engage actively in equality work and duty to issue statements (ARP), Appendix 3.

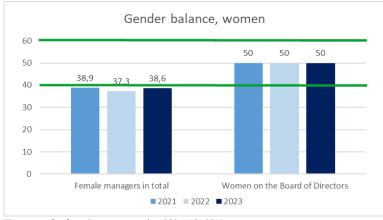

### 4.3 Equality and diversity

For us, diversity and equality mean equal rights and opportunities for all. This means that the bank creates a sense of security and an inclusive working environment, where everyone is valued for their qualities and talents and everyone can be themselves. We also focus on gender equality and diversity in our work with customers, as well as various events held by the bank.

The duty to engage actively in equality work and the duty to issue statements (ARP) means that employers not only have to report on the actual situation, but also implement measures to promote equality and prevent discrimination.

A Diversity and Equality Committee has been established at the bank and we are making determined efforts to promote diversity and prevent unequal treatment and discrimination.

It is a long-term goal to have a relatively equal distribution of gender in all job levels and business areas.

The target for female managers should be 40-60%.

There was a slight increase in the number of female managers from 2022 to 2023 to 38.6%, but this is still slightly under the goal of at least 40%.

Diversity and equality are followed up in all parts of the organisation, and the bank's regulations safeguard this in its recruitment and selection processes. In addition to its gender equality goals, the bank aims to increase the proportion of employees from ethnic backgrounds other than Norwegian.

Sparebanken Sør is certified for equality and diversity through Likestilt Arbeidsliv (Equality in Working Life), a regional certification scheme for companies that aim to contribute to gender equality and diversity in working life. The bank will be recertified in 2024.

The certification scheme includes the following focus areas:

| Embedding | Inclusive<br>workplace | Recruitment | Facilitation | Full-time<br>culture | Life phase | Equal pay |
|-----------|------------------------|-------------|--------------|----------------------|------------|-----------|
|-----------|------------------------|-------------|--------------|----------------------|------------|-----------|

We aim to ensure equal pay for equal work, regardless of gender, and our figures indicate a positive development. For several years, the bank has had an equal pay pot for local pay reviews. This pot is used to correct any pay imbalances associated with equal pay.

The target for women's pay compared to men's should be between 90–110%.

There has been a positive development in women's pay compared to men's, while there has been a slight negative development in the average salary of female managers compared to male managers. This is something that the bank will focus on in 2024.

# 4.4 Working environment and employee development

#### 4.4.1 Working environment and HSE

We aim to be an attractive and inclusive workplace for all employees, and we endeavour to ensure that all employees experience a good balance between work, home and leisure time. Flexitime schemes and a policy for the use of home offices have been established as part of the bank's life phase policy.

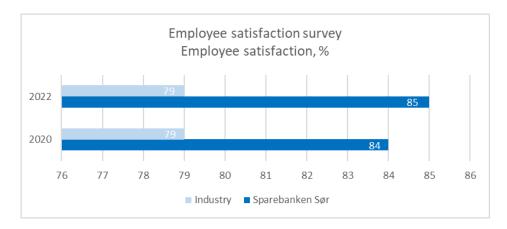

We offer employees various benefits, such as a defined contribution pension scheme, bonus schemes, subsidised loan schemes, private insurance, travel insurance, a fee-free bank account, company holiday cabins and the opportunity to purchase bank equity certificates at a discounted price. In 2023 the bonus scheme rules were changed so that employees who are on sick leave and employees on statutory leaves of absence are also covered by the scheme.

Systematic work on health, safety and the environment (HSE) is a high priority for us. The bank has established a good framework, which includes a personnel handbook, an HSE handbook and several internal contractual committees. We provide occupational health services, offer health insurance for all employees, and cooperate with an occupational psychology service. Continuous efforts are made to ensure a good working environment, and considerable resources are used to encourage employees to keep healthy through good ergonomics, physical activity and exercise, for instance, by offering financial support to the bank's company sports teams. Safety inspections are conducted annually.

HSE measures are followed up through reviews by employees with particular responsibility for HSE. We have good procedures in place for maintaining close contact with employees on sick leave.

#### 4.4.2 Employee satisfaction

We measure employee satisfaction every two years based on Kantar's employee satisfaction survey. A new survey was conducted in 2022 and the results show a slight increase, from 84 to 85%. The result is described by Kantar as excellent and we still score above the industry average. A new employee satisfaction survey will be organised in the first quarter of 2024.

We conduct annual performance appraisals with all employees, along with various measures and follow-up of improvement and development areas.

#### 4.4.3 Skills and organisational development

It is important for the bank to be able to attract, retain and develop employees with the skills that the bank will need in the future. Skills are about adaptation and building a diverse, competent workforce. Customer behaviour, regulatory requirements and new technology are the drivers for the changes we are seeing around us, and to which the bank must adapt. This means that we will need a different mix of skills than previously. We place great value on developing our own employees to meet the challenges and opportunities of tomorrow. Everyone needs to enhance their skills. Thus, the bank is investing broadly in training and development opportunities for our employees.

Technological development and the focus on being a data-driven bank are accelerating.

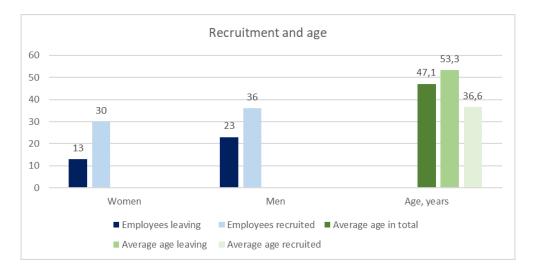

We are focused on facilitating professional development opportunities for all employees, and on ensuring that they are given opportunities to acquire the right skills in relation to the work they are to perform. Training and education take place in collaboration with both internal and external partners. New and digital solutions have been adopted.

Through access to the bank's digital learning platforms E-guide, NanoLearning and Workplace, all employees at the bank have opportunities to acquire specially adapted skills from more than 100 courses. In addition, there are annual mandatory courses for training and updating in key topics such as ethics, money laundering, data protection and information security.

# 222 hrs average training per employee in 2023

Training covers management, professional areas, products etc., as well as special topics. More details about training are available in Scorecard, section 1.2.

Employees also participate in various competence enhancement activities through external digital courses and seminars. Restructuring, employee development and the recruitment of new skills to build a bank for the future are high priorities for us.

Of the 66 employees recruited in 2022, 81.8% have completed higher education.

The bank is an active user of, and contributor to, Trainee Sør, which is a local trainee scheme in Agder county. In 2023, the bank had four trainees.

Sparebanken Sør wants to be an attractive workplace and attract future-oriented skills. In 2024 we will be launching Sør Talenter – an initiative aimed at strengthening our position as the leading financial organisation in our region. Sør Talenter is a programme for students who will soon be coming to the end of their studies. Students start in a part-time position and transition to a permanent position once they complete the programme. From September to June, the students work in a part-time position in our customer centres and can work as interns in various departments of the bank. They are also offered professional input and their own mentor at the bank. The goal is for the students to start in a relevant permanent position with us in August.

#### 5 DATA PROTECTION AND INFORMATION SECURITY

#### 5.1 General information

As a bank, we process and manage large volumes of personal data, which places demands on our handling of customer information and compliance with key data protection principles. Data protection is about ensuring the confidentiality, integrity and accessibility of all personal data that is owned, processed or managed by us. In order to create confidence, it is important for the bank to process personal data in a safe and proper manner and to comply with regulatory requirements.

We are an important corporate citizen, which means we must provide both our customers and society at large with stable, secure and user-friendly solutions. Good, stable systems and security are essential to gain the confidence of our customers and society at large, and to maintain our competitiveness. Rapid technological development requires that the bank must continuously work on measures to prevent cyberattacks and other incidents.

Data protection and information security are a priority for our customers and society in general, so these topics are naturally important to us. We have a positive actual and potential impact on data protection and

information security by ensuring that we have reliable systems, sound procedures and good training, and by ensuring that we attend to internal procedures and regulatory requirements related to these topics in a satisfactory manner. Similarly, we could have a negative impact on data protection and information security by not attending to these areas in a responsible manner. The greatest positive and negative impacts affect our customers.

We follow up these topics with relevant tangible measures to enhance the positive impact and reduce the negative impact. KPIs have been established so we can monitor and measure results and develop measures for key indicators.

### 5.2 Data protection

We process personal data in accordance with the Norwegian Personal Data Act and the General Data Protection Regulation (GDPR). The regulations regulate how we gather, store, use and erase such data. Our employees have a statutory duty of confidentiality regarding all matters concerning our customers. Only employees with an official need should have access to personal data concerning our customers. We will not collect any personal data other than what is necessary to serve the individual customer. Customers have the right to request access to their stored data at any time, as well as to request a copy of their data, and to have any inaccurate data rectified. Consent to the collection, use and sharing of data is ensured in the bank's procedures and guidelines for the Norwegian Personal Data Act, including the GDPR.

# 19 REPORTED CASES TO THE NORWEGIAN DATA PROTECTION AUTHORITY REGARDING BREACHES OF

# DATA PROTECTION ORDERS FROM THE NORWEGIAN DATA PROTECTION AUTHORITY

We process and manage large volumes of personal data, which places great demands on our handling of customer information and compliance with key data protection principles. We have appointed a Data Protection Officer to assist with ensuring compliance with the bank's requirements for processing personal data.

# 5.3 Information security

Our systems and solutions must be effective and efficient, both directly for the bank's customers and also for society as a whole.

Our procedures and infrastructure protect information about both the bank and its customers, including sensitive information, against cyberattacks. Services such as payment infrastructure (card payment, mobile banking, online banking, online business banking) are all part of the bank's critical infrastructure.

Security measures that protect customers' personal data and payment infrastructure consist of sound procedures, 24-hour monitoring and state-of-the-art security mechanisms. A key part of this work is the "Policy for information security management system, ISMS", based on ISO/IEC 27001.

#### **6 FINANCIAL CRIME**

#### 6.1 General information

Financial crime is a serious societal problem and a threat to individuals, businesses and society as a whole. Banking and finance are important contributors to the fight against financial crime, which includes, for example, money laundering, financing of terrorism, and corruption. The extent of financial crime affecting the financial sector or exploiting financial services providers is on the rise and is becoming increasingly complex. Our efforts to prevent and uncover financial crime are therefore important in a national and global perspective.

Our overall goal is to combat financial crime to reduce financial losses for society, customers and the bank, and to maintain confidence in us as a bank and the financial system. This is therefore a material topic for us. We have a positive actual and potential influence in uncovering and reducing financial crime through continuous and systematic work on money laundering, financing of terrorism, corruption and bribery. Similarly, we could have a negative impact by not attending to these areas in a responsible manner. The greatest positive and negative impacts affect society, but also affect individuals who are exposed to financial crime.

| Sør indicators   | KPI C3, KPI C4  |
| Implemented measures   | Updated governing documents. Policies, procedures, guidelines and work descriptions revised and updated in 2023. Skills requirements and training plans for all job categories have been mapped and skills programmes implemented, including mandatory e-learning for all employees and employee representatives. Through restructuring and increased resources, efforts to combat financial crime have been significantly strengthened, including the recruitment of employees from the police and the Norwegian Labour Inspection Authority with extensive investigative experience. The risk scoring model has been revised to provide more risk-based management and a more solid basis for transaction monitoring. Extensive information work has been carried out, aimed at customers and the general public, to reduce the number of fraud cases. Online support tools to detect fraud have been implemented.  We actively participate in national industry forums for combating financial crime and also cooperate with other banks and system suppliers to strengthen efforts and the quality of prevention systems. |

| Results of measures  | The number of cases of fraud has more than doubled in the past two years. The   |

#### 6.2 General information about the bank's work with financial crime

As a bank, we have zero tolerance for all forms of financial crime, and we will contribute towards a business community that is based on fair competition and legal activities. We have committed major resources to combating financial crime.

Our efforts to combat financial crime are based on applicable laws and regulations, and we have a comprehensive framework of governing documents, policies and guidelines to ensure we comply with laws and regulations and prevent financial crime, such as money laundering, fraud and financing of terrorism.

The bank's "Policy on Anti-Corruption and Bribery" provides guidelines for our stance and efforts to prevent corruption, trading in influence, bribery and use of facilitation payments.

Transaction monitoring is one of the primary methods of detecting and analysing suspicious transactions that may indicate potential money laundering and financing of terrorism. Throughout 2022, the bank checked a significant number of transactions that were flagged in the electronic transaction monitoring system or that had indications of financial crime for other reasons. In most cases, the suspicion was disproved. Transactions in which the suspicion was not disproved are reported to the Norwegian National Authority for Investigation and Prosecution of Economic and Environmental Crime (Økokrim) as prescribed by the Money Laundering Act.

We maintain robust control and have customer due diligence measures in place, as well as good internal management and monitoring systems. Sound procedures, proper training and necessary resources help to ensure that the bank is not used for financial crime. The work to prevent financial crime is challenging, and in the past year we have increased our resources and expertise in this area.

As an element of the operationalisation of ESG in business areas, measures against financial crime have been integrated into policies and systems for monitoring credit processes, investments, financing and procurement.

#### 7 RESPONSIBLE PRODUCTS AND SERVICES

#### 7.1 General information

We offer products and services that have a major impact on the finances of private individuals and companies. To help customers make the right choices, it is important to provide good, objective and understandable information and marketing of products and services.

Sustainable products and services in accordance with recognised classification criteria are the bank's most important instrument for achieving the UN Sustainable Development Goals, the Paris Agreement, the UN Biodiversity Agreement and the green transition. This also applies to new business and product areas. Thus, responsible products and services are an important topic for us. We have a positive actual and potential impact on customers making the right choices by providing good and objective product information.

Similarly, we could have a negative impact by not attending to these areas in a responsible manner. The greatest positive and negative impacts affect individual customers.

We have a major positive actual and potential impact on society, the climate and nature by offering sustainable products and services, and would have a corresponding negative impact if such products were not offered to customers. The impact affects the bank, customers and society locally, nationally and globally.

| ı | KPI D2 | Lost cases, breach of marketing communications    | Number | 0    |      | 0    | 0    | 0    | V               |

For more information on sustainable products, please refer to section 8 Responsible credit activities, and section 9 Responsible investment and financing.

### 7.2 Product information and marketing

We are concerned about having transparent and understandable products and services, and marketing these in an ethical way so that customers can make sound financial choices. There are strict requirements for product labelling, service information and marketing. The bank therefore has a strong focus on advisory services, offering customers safe products, and ensuring that the sale and marketing of products is conducted in a responsible manner in accordance with legislation. All financial advisers have approved certification schemes that meet the requirements of the Finance Industry's Authorisation schemes (FinAut) and have updated their skills in line with the certification schemes. We have established guidelines for quality assurance and risk assessment of products, systems and services, and to ensure compliance with the requirements for information, labelling and marketing.

Sustainable products and services are an important tool for helping to achieve the UN's Sustainable Development Goals, the Paris Agreement and the green transition. We work actively with sustainable products and aim to increase the proportion of sustainable activities in our business areas.

The use of recognised frameworks and ethical product information and marketing will ensure that our products meet the classification criteria for sustainable products and services, in addition to preventing greenwashing.

Guidelines and systems have been established for the registration, processing and follow-up of complaints related to violations of laws and guidelines for products, service information, labelling and marketing.

# 7.3 Framework for green, social and sustainable products

We have established a "Framework for green, social and sustainable products". The framework is based on internationally recognised principles. The purpose of the framework is to develop and disseminate sustainable products as an important contribution to the green transition. We will expand our range of sustainable products based on this framework and on current classification criteria.

# 7.4 Green and Sustainability Bond Framework

We have established two bond frameworks (2019 and 2022). The frameworks were established in accordance with ICMA (International Capital Market Association) standard principles for green, social and sustainable bonds. The framework, which was updated in 2022, also requires the proceeds from the bond issues to be allocated to projects that are defined as green and sustainable in accordance with the EU taxonomy. Green and sustainable financing enables the bank to contribute to the realisation of its customers' green and sustainable projects.

# 7.5 Digitalisation

Digitalisation of processes and distribution of products and services are important tools for contributing to a sustainable transition. Digital solutions lead to more self-service of financial products and services, and reduced travel activity. We have worked hard to enhance the customer experience in our most visited

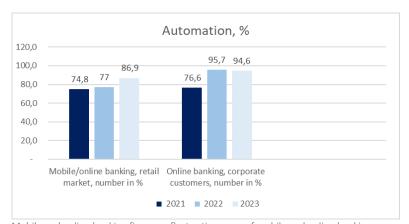

channel: the mobile app for private customers. Navigation in the app has been improved. It is now easier to increase saving and customers can easily generate quotes for insurance. Use of the mobile app is increasing, and the number of private customers who no longer use online banking and exclusively use the mobile banking app has almost doubled since 2020.

We are also seeing strong growth in the use of mobile banking on the part of corporate customers. Good access to the most important services is also important for corporate customers, even if the online business banking service has the highest visitor numbers from this group. With almost all corporate customers using online business banking, we will have streamlined digital communication with our customers, and physical mail, such as bank statements, will be reduced to a minimum.

Sustainable products and activities will help to reduce negative and increase positive impacts in the ESG area. We will continue to facilitate solutions that can contribute to more sustainable development.

We are a member of Digital Samhandling Offentlig Privat (Digital Collaboration Public Private), which is a collaboration to digitalise and streamline important processes in society. This collaboration contributes to the realisation of several of the UN's Sustainable Development Goals.

We are at the forefront in terms of the automation of financial products and services.

Mobile and online banking figures reflect active users of mobile and online banking as a percentage of active customers (exposures of over NOK 1,000).

#### 8 RESPONSIBLE BUSINESS ACTIVITIES

#### 8.1 General information

Banking and finance play a key role in economic developments in their market area and are essential for value creation in society. Our role is primarily to manage deposits and finance retail customers, corporate customers and the public sector. Customer needs should always be our starting point, and customers should have confidence that we wish them well.

In order to be a safe and long-term business partner, we must act honestly and transparently, maintain a high ethical standard, and at all times conduct our activities in accordance with applicable laws and regulations. Corporate governance will ensure that we do not contribute to the violation of human and employee rights, corruption, unacceptable greenhouse gas emissions, serious environmental damage or other acts that may be perceived as unethical or irresponsible. Through responsible and secure banking services, we will contribute to the financial security of our customers. Identifying customers' need for financial services should be based on a long-term and confidence-building perspective, which is why this topic is so fundamentally important for us.

We have a great positive actual and potential impact on customers and society, by acting as a responsible corporate citizen, and would have a corresponding negative impact if this did not happen. The impact affects the bank, customers and society.

| KPI    | Description   | Unit      | Goal | Time | 2021 | 2022 | 2023 | Goal attainment |
|--------|---|-----------|------|------|------|------|------|-----------------|
| KPI E1 | Customer satisfaction indicator, retail market                      | Place no. | ≤ 3  |      | 11   | 6    | 10   | X               |
| KPI E2 | Customer satisfaction indicator, corporate market                   | Place no. | ≤ 3  |      | 7    | 7    | 7    | X               |
| KPI E3 | Complaint cases lost at the Norwegian Financial Services Complaints | Number    | 0    |      | 0    | 2    | 1    | X               |
| KPI E4 | Whistleblowing cases internal and external                          | Number    | 0    |      | 4    | 2    | 4    | X               |
| KPI E5 | ESG Rating Sustainalytics, Low risk 10 ≥ 20 points                  | Points    | 20   |      | 11,7 | 9,7  | 10,8 | V               |

#### 8.2 Ethics

We have ethical guidelines to ensure that all parts of the organisation understand and respect our ethical standards. The ethical guidelines apply to all employees and describe, for example, how employees should respond to challenges related to impartiality and conflicts of interest, participation in other commercial activity, as well as trading in financial instruments. All employees review the ethical guidelines on an annual basis. An annual update on ethics is provided as part of the various authorisation schemes for the bank's financial advisers.

The bank has held an ethical guidelines refresher course for all departments.

### 8.3 Customer complaints

We have sound systems and procedures in place for handling customer complaints, see Sustainability library. Complaints may arrive through various channels and good solutions have been established for receiving, registering, handling and reporting complaints, and for implementing measures. In 2023, a total of 16 complaints were reported to the Norwegian Financial Services Complaints Board; the bank lost one of the cases. The complaints have been resolved.

# 8.4 Whistleblowing

We aim to be a safe and positive workplace and want to facilitate a culture of freedom of expression. We have therefore established whistleblowing procedures to prevent, identify and rectify misconduct or wrongdoing. Employees are encouraged to report any misconduct or wrongdoing they become aware of, or that they have experienced themselves. A procedure has also been established for external third-party whistleblowing.

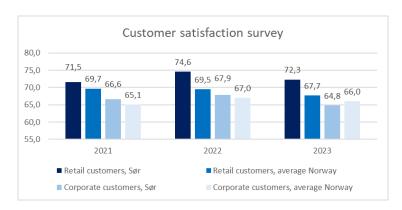

Whistleblowing can take place through several channels, and reports can be submitted anonymously. Anonymous whistleblowing cases are sent directly to an independent external third party, BDO AS. Sound procedures have been established for reporting, follow-up and measures. In 2023, four whistleblowing cases were registered, three internal and one external. Measures were implemented in relation to all four cases, with varying degrees of seriousness. All were handled in accordance with the whistleblowing procedures and resolved. Professionals from the HR department were involved in two of the whistleblowing cases.

Our whistleblowing procedures can be found here: https://www.sor.no/felles/om-sparebanken-sor/about/social-responsibility/sustainability-reports/

#### 8.5 Customer satisfaction

Responsible and ethical business activities in all areas are essential for achieving trust and good customer relationships.

Although we did not achieve our ambition of being among the three banks that scored the highest in 2022, the bank scored high on customer satisfaction in EPSI Norway's annual bank survey. We have seen negative development in the past year, something that is affecting the entire industry. We are above the industry average for both retail and corporate customers.

# 8.6 ESG regulations (Taxonomy and detailed information about the regulations)

In 2019, the EU presented its green growth strategy, the "European Green Deal", with the goal of ensuring more sustainable economic development with less pollution and lower greenhouse gas emissions, better health, increased quality of life and new jobs. In the wake of the Green Deal, the EU has established a number of measures and regulations that affect the financial sector. As a member of the EEA Agreement, it is natural for the Norwegian market to closely follow what is happening in the EU. We will be affected by a number of forthcoming measures for sustainable finance, and we have implemented or are in the process of implementing interdisciplinary projects to meet the new regulatory requirements and establish ownership of the work ahead. In 2023, we worked on reporting on EU taxonomy in accordance with the first two environmental goals, see point 8.7.

We have also been working on analysing GAP with regard to the Corporate Sustainability Reporting Directive (CSRD). The work on regulations, including data, systems and reporting solutions to address the regulations and work associated with ESC will in general continue in 2024.

# 8.7 EU taxonomy

Through the European Green Deal, the EU has set ambitious goals for achieving the aim of the Paris Agreement of net-zero emissions of greenhouse gases by 2050. To achieve these goals, the EU is relying on redirecting capital to invest in the green transition.

The aim is for capital to be directed towards sustainable green investments, to reduce climate emissions and environmental damage, and to ensure a fair transition.

The EU has therefore launched its own action plan for sustainable finance that includes several comprehensive new regulations, and the EU taxonomy for sustainable activities is the foundation of this work.

The regulations contain reporting requirements for major listed companies and financial institutions. Sparebanken Sør is currently subject to disclosure requirements for non-financial information under the Norwegian Accounting Act. In accordance with the law on sustainable finance that came into force in Norway on 1 January 2023, Sparebanken Sør will be obliged to report taxonomy information for the financial year 2023. Through sustainable products, Sparebanken Sør will be able to channel capital into sustainable activities.

The EU taxonomy is a classification system that defines which activities are sustainable. It includes financial products such as loans and investments.

The taxonomy currently includes two of six environmental objectives, and reporting in 2023 will therefore be somewhat limited in scope. The taxonomy will be further developed and expanded in the years to come. More information about our sustainable products can be found on the bank's website.

https://www.sor.no/felles/om-sparebanken-sor/about/social-responsibility/sustainability-reports/ https://www.sor.no/felles/om-sparebanken-sor/about/investor-relations/green-and-sustainability-bondframework/

The taxonomy includes reporting requirements, key indicators and templates for both financial and nonfinancial companies. The most important key indicator is the Green Asset Ratio, GAR. This shows what proportion of the bank's loans and investments are given to activities that are defined as green according to the taxonomy. The taxonomy provides for a gradual extension of the reporting requirements related to GAR. The level of detail, and thus the extent of the obligation to obtain information, will gradually increase towards 2026. For 2023, there are only requirements for reporting on loans, but for the financial year 2024, investments must also be reported.

The table below shows the EU taxonomy's six environmental objectives:

#### The EU taxonomy's six environmental objectives

Climate change

Sustainable use and protection of water and marine resources

Pollution prevention and control

Transition to a

Protection and restoration of biodiversity and ecosystems

The reporting for 2023 includes two of the six environmental objectives, "climate change mitigation" and "climate change adaptation". The 2024 reporting will cover all six environmental objectives.

To align with the requirements of the taxonomy regulations, the following three criteria must be met:

- 1. The technical criteria of the EU taxonomy must be met.
- 2. The activity must not harm any of the other environmental objectives, "Do no significant harm".
- 3. The minimum social and governance requirements, "Minimum social safeguards" must be met.

The taxonomy regulations require comprehensive reporting. The key information is:

- 1. What proportion of the bank's lending is eligible by the taxonomy regulations
- 2. What proportion of the bank's lending align to the requirements of the taxonomy regulations
- 3. Green Assets Ratio (GAR) i.e. what proportion of the bank's balance sheet meets the requirements of the taxonomy regulations

| Sustainable assets in accordance with the EU taxonomy (Taxonomy Aligned) as of      |             |
|---|-------------|
| 31.12.23  | NOK million |
| Loans to households with home mortgages   | 14,400      |
| Bonds with preferential rights (secured by mortgages)                               | N/A*        |
| Loans to non-financial corporations (covered by the NFRD)                           | 70          |
| Sustainable economic activity in accordance with the EU taxonomy (Taxonomy Aligned) | 14.470      |

<sup>\*)</sup> Sparebanken Sør has a liquidity portfolio which, among other things, comprises bonds with preferential rights that are secured by mortgages. Parts of this portfolio are defined as green bonds, but it is not known what proportion of this portfolio is in accordance with the criteria of the EU taxonomy.

| Assets covered by the EU taxonomy (Taxonomy Eligible) as of 31.12.23          | NOK million |
|---|-------------|
| Loans to households with home mortgages                                       | 79,723      |
| Bonds with preferential rights (secured by mortgages)                         | 13,018      |
| Loans to non-financial corporations (covered by the NFRD)                     | 184         |
| Economic activity covered by the taxonomy (Taxonomy Eligible)                 |             |
| Economic activity <b>not</b> covered by the taxonomy (Taxonomy Non-Eligible), |             |
| but included in the denominator for calculating GAR                           | 54,723      |
| Total assets included in the calculation of GAR                               | 147,648     |
| Assets not included in the calculation of GAR                                 | 9,728       |

| Green Asset Ratio (GAR)             | 9.80% |
|-------------------------------------|-------|
| Green Asset Ratio Flow (GAR FLOW)** | 31%   |

<sup>\*\*)</sup> Green Asset Ratio Flow (GAR FLOW) is calculated as the increase in sustainable economic activity in accordance with the EU taxonomy (Taxonomy Aligned) from 2022 to 2023.

For further details see Appendix 4 section 16 "EU Taxonomy Green Asset Ratio Template".

#### 9 RESPONSIBLE CREDIT ACTIVITIES

#### 9.1 General information

Lending to retail customers and corporate customers represents our core operations, and lending is the area in which we can have the greatest impact on our customers' greenhouse gas emissions.

The positive impact from our lending activities can take place through a shift to sustainable products and, through our lending activities, by focusing on reducing our customers' greenhouse gas emissions. Both the positive and negative impacts are greatest for society, but also represent opportunities and risks for customers and the bank. Thus, this is one of our most important topics.

#### Information table

| Topic                              | Comments  |
|------------------------------------|---|
| 12 ANSVARIIG FORBRUK OG PRODUKSJON | <ul> <li>Key focus areas:</li> <li>Address risks and opportunities related to ESG in the extension of credit</li> <li>Offer sustainable products and services</li> <li>Consider ESG risk in the extension of credit</li> <li>Reduce negative impact on climate and nature through the bank's lending activities</li> </ul>                        |

#### KPIs and goal attainment

| KPI    | Description   | Unit | Goal | Time   | 2021 | Base line<br>2022 | 2023 | Goal attainment |
|--------|---|------|------|--------|------|-------------------|------|-----------------|
| KPI F1 | Green home mortgages, annual growth in per cent                   | %    | ≥ 10 | Annual | NA   | NA                | *    | V               |
| KPI F2 | Green home mortgages, percentage                                  | %    | ≥ 50 | 2030   | NA   | *                 | 18,1 |                 |
| KPI F3 | Green loans for commercial real estate, annual growth in per cent | %    | ≥ 10 | Annual | NA   | NA                | 0    | X               |
| KPI F4 | Green loans for commercial real estate, percentage                | %    | ≥ 50 | 2030   | NA   | 22,0              | 21,3 |                 |

Green mortgages and green commercial real estate loans are calculated on the basis of criteria in the Green and Sustainability Bond Framework.

# 9.2 Strategic guidelines

Responsible credit activities entail attending to social conditions, good corporate governance and climate and nature in the extension and management of credit. The main objective is to achieve a good long-term return with an acceptable level of risk and to contribute to sustainable development.

ESG represents both risk and opportunity. It represents risk primarily through weakened earnings and/or increased losses due to the inability or unwillingness to adapt to safeguard the climate and nature. It represents an opportunity as a result of new business activities through access to new technology, markets, industries, customers and products. By setting requirements for our customers through lending activities, as well as increasing the proportion of sustainable products, the bank can reduce and manage ESG risk.

<sup>\*</sup> Data for 2022 is based on an older version of the Green and Sustainability Bond Framework than 2023, and so is not comparable

Global and national regulations and initiatives, including the EU Green Deal and the EU taxonomy, will lead to a strong shift towards more sustainable financial activities, products and services in the future.

Strategic guidelines for work with the lending portfolio:

- Reduce the negative impacts of the lending portfolio on greenhouse gas emissions, nature, social
  conditions and corporate governance, primarily through measures for improvements and
  sustainable products, but also through exclusion criteria for industries and customers.
- Contribute to increasing knowledge about ESG and to helping customers make more sustainable choices
- Manage the bank's ESG risk in accordance with risk and risk tolerance measures.
- Increase the proportion of sustainable products and services.
- Take advantage of opportunities for increased earnings through new products, services, industries and markets as a result of the green transition.

## 9.3 Greenhouse gas emissions in the lending portfolio

We have used the guidance from Finance Norway for calculating greenhouse gas emissions for mortgages, as well as the "sale and operation of real estate" category in the corporate market. We have used PCAF (Partnership for Carbon Accounting Financials) data and a method based on balance to calculate greenhouse gas emissions from other customers in the corporate market.

|  | Total lending   Scope 1   Scope 2   Scope 3 |           | Scope 3         | Scope 1 og 2 | Tonn CO2 pr  | Emission KG |             |
|--|---|-----------|-----------------|--------------|--------------|-------------|-------------|
| Industry                                 | NOK mill.                                   | Tonn CO2  | Tonn CO2        | Tonn CO2     | Tonn CO1     | миок        | CO2 per sqm |
| Retail customers                         |   |           |                 |              |              |             |             |
| Mortgage*                                | 79.723,5                                    |           |                 |              | 11.454,5     | 0,14        | 3,71        |
| Other loan and credit*                   | 2.448,1                                     |           |                 |              | 351,7        | 0,14        |             |
|  | 82.171,6                                    |           |                 |              | 11.806,2     | 0,14        |             |
|  | Total lending Sc                            |           | Scope 1 Scope 2 |              | Scope 1 og 2 | Tonn CO2 pr | Emission KG |
| Industry                                 | NOK mill.                                   | Tonn CO2  | Tonn CO2        | Tonn CO2     | Tonn CO2     | MNOK        | CO2 per sqm |
| Agriculture and related services         | 992,0                                       | 132.970,9 | 103,9           | 31.916,3     | 133.074,8    | 134,15      |             |
| Forestry and related services            | 183,9                                       | 2.406,4   | 12,9            | 2.958,2      | 2.419,3      | 13,16       |             |
| Fishing, trapping and aquaculture        | 501,2                                       | 5.796,2   | 46,8            | 11.519,6     | 5.843,0      | 11,66       |             |
| Mining                                   | 75,6  | 2.535,2   | 6,9             | 2.874,9      | 2.542,1      | 33,61       |             |
| Industry                                 | 815,8                                       | 4.752,0   | 127,8           | 25.018,0     | 4.879,8      | 5,98        |             |
| Energy production and supply             | 79,7  | 41,7      | 0,9             | 181,6        | 42,6         | 0,53        |             |
| Water, wastewater and waste disposal     | 90,8  | 4.906,6   | 13,4            | 4.901,0      | 4.920,0      | 54,19       |             |

Scope 1: Direct emissions (operating assets over which the company has operational control, e.g. the use of fossil fuels).

Scope 2: Indirect emissions from purchased energy – electricity and district heating/cooling.

Scope 3: Indirect emissions from input factors (Upstream: greenhouse gas emissions from purchased goods or services, e.g. air travel; Downstream: greenhouse gas emissions from goods and services offered to others).

<sup>\*)</sup> Greenhouse gas emissions calculated based on guidance from Finance Norway. Other loans to retail customers are estimated with the same CO2 emissions per million lent as mortgages.

Our lending portfolio mainly comprises customers with low greenhouse gas emissions. There is little statistical basis available for benchmarking greenhouse gas emissions from the lending portfolio. Previous calculations based on data on greenhouse gas emissions from Statistics Norway indicate that our greenhouse gas emissions from lending are significantly lower than the average in the financial industry, which the industry composition also indicates.

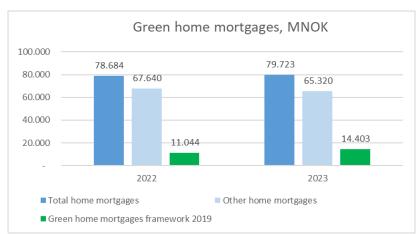

We will continue our work to improve data and methods for calculating greenhouse gas emissions from the lending portfolio.

### 9.4 Responsible credit activities in the retail market

Most loans in the retail market are home mortgages. The ESG risk in the retail market is primarily related to climate and nature, i.e. climate change and the impact of natural disasters on the value of our pledged property in connection with home mortgage financing.

The negative impact of the retail market on ESG is relatively limited and mainly related to greenhouse gas emissions from energy consumption for housing, behaviour and consumption patterns, and the use of natural areas and natural resources in new construction.

It is important to have good guidelines and solutions in place to manage risk and reduce the negative and increase the positive impact on ESG. To that end, we offer "Green home mortgages".

Green loans are loans that qualify in accordance with the Green and Sustainability Bond Framework/EU taxonomy.

We currently have a portfolio of "Green home mortgages" (qualifying according to the bank's framework) of around NOK 11,044 million.

# 9.5 Responsible credit activities in the corporate market

Our portfolio in the corporate market includes various industries, primarily in the SME segment. The largest industry in terms of lending volume is commercial real estate.

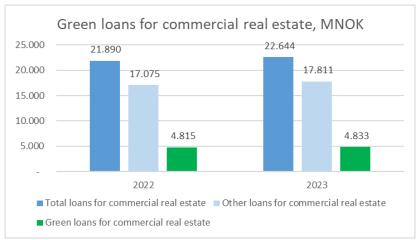

The ESG risk in the corporate market is primarily related to increased losses and reduced earnings for us as a result of factors related to the climate and nature. Such factors could have a major impact on the bank, customers and industries in terms of physical risk and adaptation risk. This could lead to changes in the supply and price of greenhouse gas emissions, input factors such as natural areas and natural resources, as well as markets and the demand for products and services.

We have integrated an ESG module with a special focus on climate in the bank's credit processes. The module is mandatory for all loan cases for customers with an exposure greater than NOK 8 million. The module

provides a risk class for ESG risk, based on a weighted score of climate, nature, social conditions and corporate governance. An ESG risk class creates a basis for managing processes, authorisations and price. The purpose is to map the ESG risk for customers and the loan application, as well as to be able to implement measures to reduce the customer's ESG risk.

The results indicate that there is a relatively low ESG risk in the analysed cases, which corresponds well with our industry composition and analyses of greenhouse gas emissions.

The ESG module is being developed on an ongoing basis.

Green loans are loans that qualify in accordance with the Green and Sustainability Bond Framework/EU taxonomy.

#### 10 RESPONSIBLE INVESTMENT

#### 10.1 General information

The main objective of our investment activity is to manage the Group's liquidity risk and to comply with regulatory requirements for managing this type of risk by establishing an interest-bearing liquidity portfolio. Investment activity should also facilitate strategic business development through equity investments in selected companies. We do not have a trading portfolio in equity instruments.

For Sparebanken Sør, responsible investment means that we must safeguard the climate and nature, social conditions and good corporate governance in our management activities. Investment activities must be conducted in such a way that the bank is not complicit in the violation of human and employee rights, corruption, unacceptable greenhouse gas emissions, serious environmental damage or other acts that may be perceived as unethical or irresponsible.

We aim to make sustainable and profitable investments and offer a competitive range of financial instruments to our customers, while also fulfilling our ESG commitments.

In addition to lending, investment is considered to be an area in which we can have the greatest actual and potential positive ESG impact on customers, society and in our own business. The positive impact will take place through investments in sustainable bonds in the liquidity portfolio and financing through the issuance of sustainable bonds in line with the Green and Sustainability Bond Framework. If we do not focus on sustainability, we will have a negative impact. The social impact is greatest, but it also represents both an opportunity and a risk for customers and us as a bank.

This is therefore an important topic for us.

#### KPIs and goal attainment

| KPI    | Description  | Unit | Goal  | Time | 2021  | 2022   | 2023   | Goal attainment |
|--------|--|------|-------|------|-------|--------|--------|-----------------|
| KPI G1 | Sustainable bonds, liquidity portfolio                     | MNOK | 5.000 | 2023 | 1.495 | 3.178  | 5.619  | V               |
| KPI G2 | Bond financing under Green & Sustainability Bond Framework | MNOK |       |      | 5.102 | 12.231 | 12.231 |                 |

# 10.2 Investments in the liquidity portfolio

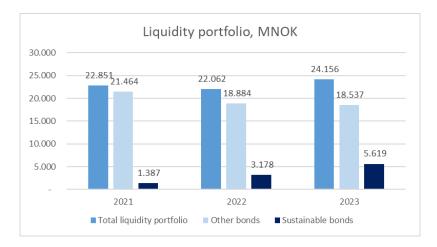

In order to be able to manage the Group's liquidity risk in accordance with the objectives adopted by the Board, we have established a liquidity portfolio consisting of particularly liquid interest-bearing securities with high credit quality. The composition of the portfolio is based on statutory requirements and guidelines adopted by the Board. The investments are made in securities that are traded in established markets, where

the bond issuers are subject to regulatory requirements for ESG set by the authorities, the Stock Exchange and in line with the expectations of institutional investors. This includes guidelines related to financial crime and financing of terrorism, and to human and employee rights. The issuers in which investments are made are also domiciled in regions where there is emphasis on risk related to the environment, nature and climate.

We want to help the financial market channel investments into sustainable business.

The portfolio's ESG risk must be assessed periodically, and at least once a year. If the assessment identifies breaches of our guidelines, the reason for and the severity of the breach must be evaluated. A thorough assessment of the underlying matters and the reason for the ESG breach must be carried out before any investment is realised.

The aim is to increase the sustainable part of the liquidity portfolio to NOK 5.5 billion during 2024, taking into account guidelines for liquidity risk and market availability.

# 10.3 Investments in subsidiaries and companies in which the bank has ownership stakes

The Group includes the bank's wholly and partly owned companies. Our wholly owned mortgage company, Sparebanken Sør Boligkreditt AS, is closely integrated with our financial activities. We also have ownership positions in Sørmegleren AS, Frende Holding AS and Brage Finans AS, which are consolidated in the income statement and balance sheet.

We have other ownership positions in companies that are of strategic importance to the bank's business operations, of which Vipps Holding AS is one of the most important.

We emphasise that companies in which we have significant ownership positions must comply with our guidelines for sustainable business. We aim to be a positive contributor to increasing the companies' focus on sustainability and want to stimulate sustainable development through investment decisions. ESG must therefore be emphasised when we have the opportunity to exercise active ownership, and this is dictated by the size and importance of our ownership position.

Our guidelines state how our exercise of ownership in companies in which we have real influence must be followed up, and how any breaches of the guidelines should be handled.

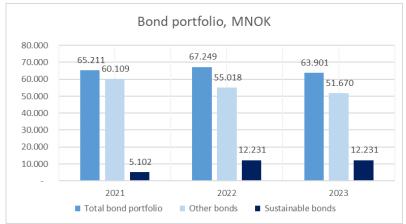

# 10.4 Financing in line with the Green and Sustainability Bond Framework

We have established a special "Green and Sustainability Bond Framework", which describes the Group's obligations to Norwegian and international investors in the bank's or the mortgage company's issued bonds that are defined as green, social and sustainable.

The guidelines in the framework follow the financial market's established standards for such bond issues. When using the framework, we are obliged to the bond investors to use the proceeds from the bond financing for green and sustainable purposes. Based on the EU's sustainability taxonomy, the framework defines the sustainable businesses to which the capital can be channelled. The framework also provides guidelines for internal approval processes when financing is to be allocated and for making available information about the allocation that has taken place. The Green Bond Committee is the Group's body for allocation decisions and investor information is made available on our website.

By issuing sustainable bonds to a large investor base in Norway and abroad, we contribute to the green transition by channelling financing to sustainable activities.

The Group's Green and Sustainability Bond Framework was established in 2019, and Sparebanken Sør Boligkreditt AS completed its first green bond financing in the autumn of the same year. Subsequently, we have also issued senior debt under the same framework. The bond framework was revised in Q1 2022, and the EU taxonomy definition of sustainable residential and commercial properties is largely taken into account in this revised version.

<sup>\*</sup> Bonds under the Green and Sustainability Bond Framework are divided into covered bonds (NOK 10,231 million) and senior debt (NOK 2,000 million).

The Group's long-term financing plan entails facilitating further issuances under the Group's Green and Sustainability Bond Framework.

# 10.5 Investments made by fund managers in fund products distributed by the bank

We do not engage in fund management ourselves but distribute fund products through Norne Securities. Through our partly owned product company Norne Securities, we distribute funds from reputable fund managers affiliated with UNEP FI PRI (UN Principles for Responsible Investment), and comply with the investment principles of UNEP FI PRI.

We require Norne Securities to distribute funds that comply with the bank's "Policy for responsible investment and responsible securities trading". Norne Securities has confirmed that all distributed funds

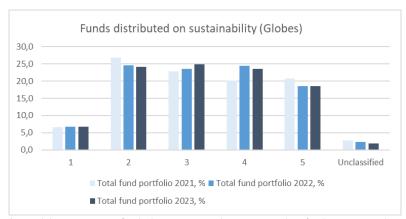

comply with our policy. We have Product Management procedures for the handling and approval of fund products. In the event of changes in service offerings, there is increased emphasis on principles for sustainable investments, and in 2020, ESG was added to the bank's product approval procedure. When expanding external funds, there is a strong focus on sustainable alternatives.

As of 31 December 2023, the fund products we distribute through Norne Securities have the following classification in terms of sustainability:

| Funds distributed on sustainability |    |           |    |    |   |    |  |  |  |
|-------------------------------------|----|-----------|----|----|---|----|--|--|--|
| Number of globes                    |    |           |    |    |   |    |  |  |  |
|                                     | 1  | 1 2 3 4 5 |    |    |   |    |  |  |  |
| Funds, number, %                    | 17 | 25        | 35 | 34 | 7 | 22 |  |  |  |

<sup>\*</sup> Five globes are given to funds that are among the top 10% in their fund category, and one globe is given to funds that are among the weakest 10% in their fund category, based on Morningstar's definition.

The portfolio (MNOK) of funds in % distributed by us as of 31 December 2023, broken down by sustainability based on the number of globes (classification of sustainability), is shown in the figure below.

<sup>\*</sup> Five globes are given to funds that are among the top 10% in their fund category, and one globe is given to funds that are among the weakest 10% in their fund category, based on Morningstar's definition.

There has been stable development in the proportion of sustainable funds (with the most globes).

#### 11 RESPONSIBLE PROCUREMENT

#### 11.1 General information

Responsible procurement entails attending to social conditions, good corporate governance and the climate and nature in procurement processes and the selection of suppliers and partners. The requirements for protecting labour and human rights (social conditions) have been further strengthened through the Norwegian Transparency Act, which entered into force on 1 July 2022. The Act requires the bank to conduct due diligence assessments of its supply chains and partners. The bank's policy is to cooperate with the suppliers and partners that take ESG seriously. The procurement of products, services and goods is an important and necessary part of the bank's activities.

Sparebanken Sør aims to enter into cooperation with suppliers and partners who have competitive prices, but who also meet ESG requirements and, in cooperation with the bank, can develop in a positive direction in relation to ESG.

Responsible procurement is an area in which the bank can have a positive actual and potential impact on customers, the bank and society. The positive impact will primarily take place by following ESG requirements, while also further developing the positive impact in important ESG areas. If the bank does not focus on ESG in its procurements, it will have a negative impact. Both the positive and negative impacts are greatest for society, but also represent risks and opportunities for suppliers, partners and the bank.

| KPI H4  | Moderate risk of violations of labour and human rights           | % volume |      |      |      | 59,4 | 60,3 |                 |
| KPI H5  | High risk of violations of labour and human rights               | % volume |      |      |      | 1,1  | 2,6  |                 |
| KPI H6  | Suppliers who have reported violations of labor and human rights | Number   | 0    |      |      | 2    | 0    | V               |
| KPI H7  | Have good management systems for corporate governance            | % volume |      |      |      | 85,8 | 85,7 |                 |
| KPI H8  | Low risk related to corporate governance                         | % volume |      |      |      | 94,3 | 94,0 |                 |
| KPI H9  | Have good management systems for climate and nature              | % volume |      |      |      | 91,0 | 90,7 |                 |
| KPI H10 | Low risk related to climate and nature                           | % volume |      |      |      | 37,9 | 35,2 |                 |

<sup>\*</sup> The unit "% volume" is to be understood as % of suppliers > NOK one million that have been risk assessed in the individual category

### 11.2 Suppliers and partners

#### 11.2.1 Introduction

The bank has assessed the risk related to labour and human rights (the Norwegian Transparency Act), corporate governance and the climate and nature of its suppliers and partners.

The table below shows the scope of procurement from suppliers and partners:

| SUPPLIERS AND BUSINESS PARTNERS                  |             |      |        |
|--|-------------|------|--------|
| Procurements from suppliers and partners         | NOK million | %    | Number |
| Annual procurements, NOK mill.                   | 553         | 100  | 1.400  |
| Suppliers with annual procurements > NOK 1 mill. | 446         | 80,7 | 51     |
| Suppliers with annual procurements < NOK 1 mill. | 107         | 19,3 | 1.341  |

The suppliers are mainly Norwegian suppliers within the following industries:

- IT, data, communications and computer systems
- Insurance
- Energy
- Banking systems
- Consultants and lawyers
- Product and system suppliers

These account for approximately 80% of the bank's total procurements, of which the IT, data, communications and computer systems category accounts for by far the largest proportion. Our suppliers and partners are mostly large, professional Norwegian companies, plus some global companies that have good systems and limited risk. The biggest risk is subcontractors.

| Risk analysis, suppliers  | NOK million | %   | Number |
|---|-------------|-----|--------|
| Suppliers with annual procurements > NOK 1 mill.                              | 446         | 100 | 51     |
| Risk analysis, suppliers > NOK 1 mill.  | 446         | 100 | 51     |
| No risk analysis, suppliers > NOK 1 mill.                                     | 0           | 0   |        |
| Suppliers with risk analysis conducted > NOK 1 mill., in % of annual procurer | 100         |     |        |

The analysis of suppliers covers approximately 80% of the bank's total procurements.

The risk for suppliers with which the bank has a procurement volume of less than NOK one million is considered to be low.

The risk assessments are based on dialogue with suppliers and partners, feedback from questionnaires, knowledge and other information about suppliers and partners.

The results of the risk analysis are included in the sections below.

## 11.3 Labour and human rights (the Norwegian Transparency Act)

#### 11.3.1 Introduction

This section deals with how the bank addresses labour and human rights at its suppliers and partners. This Sustainability Report includes a brief summary of our work with the Norwegian Transparency Act. A full report can be found on our website at https://www.sor.no/felles/om-sparebanken-sor/about/social-responsibility/norwegian-transparency-act/

Our website also contains more detailed information about governing documents and the bank's work with the Norwegian Transparency Act.

The most important elements of the Norwegian Transparency Act are:

- Section 4 Duty to carry out due diligence
- Section 5 Duty to account for due diligence
- Section 6 Right to information

### 11.3.2 Risk analysis and due diligence assessments

The bank has carried out a risk analysis (due diligence) of selected conventions relating to labour and human rights.

The table below shows the results of the analysis.

| RISK ANALYSIS LABOUR AND HUMAN RIGHTS                                      |                     |        |    |  |  |
|--|---------------------|--------|----|--|--|
| Misc. information from the risk analysis of labour and human rights (L&H)  | Number of suppliers |        |    |  |  |
| INISC. INFORMATION From the risk analysis of labour and numan rights (L&H) | Yes                 | Partly | No |  |  |
| The supplier has governing documents for L&H                               | 45                  | 2      | 4  |  |  |
| The supplier has management systems for L&H, e.g. ISO 45001                | 29                  |        | 22 |  |  |
| The supplier has performance goals for L&H                                 | 34                  |        | 17 |  |  |
| The supplier states they have had violations of L&H                        | 0                   | 0      | 51 |  |  |
| The supplier has foreign subcontractors                                    | 30                  |        | 21 |  |  |
| The supplier states they have mapped L&H risk at subcontractors            | 5                   | 15     | 10 |  |  |
| The supplier states subcontractors have had violations of L&H              | 0                   |        | 51 |  |  |

The results confirm that, overall, our suppliers have good systems and procedures in place for following up labour and human rights. Our major suppliers are also covered by the Norwegian Transparency Act.

None of our suppliers have stated that their subcontractors have had any violations of labour and human rights in 2023.

The greatest risk of violations of labour and human rights is considered to rest with subcontractors in vulnerable countries.

The figure below shows suppliers and partners' assessed risk of violations of labour and human rights.

<sup>\*</sup> Number of suppliers with deliveries > NOK one million

Based on an overall assessment, our suppliers and partners have a low or medium risk of violations of labour and human rights.

There are two suppliers that we have assessed as high risk. This risk is primarily related to the geographical location of products and subcontractors.

The labour and humans rights work forms the basis of a risk-based approach. It must also be pointed out that there are some suppliers for whom our procurements are so small compared to national and/or especially global procurements that we have very little or no influence. It is therefore important to focus this work on suppliers and partners so that we have the opportunity to make a positive influence.

### 11.3.3 Follow-up and measures

Thus far, no violations of labour and human rights have been uncovered that require special follow-up and measures in 2023.

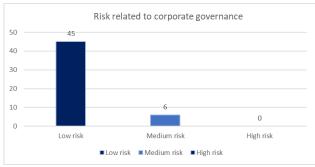

Work with the Norwegian Transparency Act is taking place on an ongoing basis, and follow-up and measures will also be assessed on an ongoing basis, e.g. after a thorough review of analyses, see point 10.3.3.

### **11.4 Corporate governance**

Results of the risk analysis.

| •  |     |                |     |
|--|-----|----------------|-----|
| RISK ANALYSIS CORPORATE GOVERNANCE                 |     |                |     |
| Corporate governance                               | Nu  | mber of suppli | ers |
| Corporate governance                               | Yes | Partly         | No  |
| The supplier has governing documents               | 35  | 10             | 6   |
| The supplier has management systems, e.g. ISO 9001 | 30  |                | 13  |
| The supplier has performance goals                 | 34  |                | 17  |
| The supplier has foreign subcontractors            | 30  |                | 21  |

Most of the bank's major suppliers have management systems, governing documents and targets.

<sup>\*</sup> Number of suppliers with deliveries > NOK one million

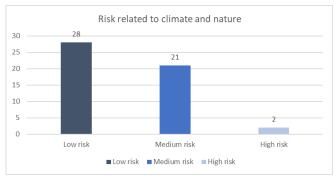

Risk associated with corporate governance is considered low.

### 11.5 Climate and nature

Results of the risk analysis.

| RISK ANALYSIS CLIMATE AND NATURE                                    |                     |        |    |  |  |  |
|---|---------------------|--------|----|--|--|--|
| Climate and nation  | Number of suppliers |        |    |  |  |  |
| Climate and nature  | Yes                 | Partly | No |  |  |  |
| The supplier has governing documents                                | 41                  | 2      | 8  |  |  |  |
| The supplier has management systems, e.g. Eco-Lighthouse, ISO 14001 | 38                  | 0      | 13 |  |  |  |
| The supplier has performance goals                                  | 38                  |        | 13 |  |  |  |
| The supplier has foreign subcontractors                             | 30                  |        | 21 |  |  |  |

Most of the bank's major suppliers have management systems, governing documents and targets. There is reason to assume that the targets are primarily related to the reduction of own greenhouse gas emissions and, to a lesser extent, indirect greenhouse gas emissions and nature.

<sup>\*</sup> Number of suppliers with deliveries > NOK one million

Risks related to climate and nature are assessed as low/medium.

However, quantification of risk with regard to geography, product range and use of raw materials is highly uncertain, especially among subcontractors. The real risk may be greater than that stated by suppliers. One measure in the future will be to try to better assess the risk related to the climate and nature in cooperation with suppliers and partners, as well as to follow up relevant and specific targets.

The risk analyses for the climate and nature must be regarded as general, as they are based on limited information.

#### 12 CLIMATE AND NATURE

### 12.1 General information

Climate and nature-related challenges constitute some of the greatest risks to both society and us as a bank. At the same time, these challenges also represent great opportunities. Climate and nature are the topics that our business activities negatively impact the most, but they are also areas in which the bank can make the most positive impact. It is particularly in the business areas of Lending, Investments and Financing, as well as Procurements, in which we have a major indirect influence on both negative and positive impacts in relation to greenhouse gas emissions and nature in the form of biodiversity, use of natural resources and natural areas.

We follow up these topics with relevant measures to enhance the positive impact and reduce the negative impact. Short and long-term KPIs have been established in order to monitor and measure results and develop measures for key indicators.

We have governing documents, policies and guidelines that show what requirements we set and how we work with this topic in relevant business areas.

#### Information table

| Topic  | Comments   |  |  |  |  |
|--|--|--|--|--|--|
| 13 STOPE 14 LIVET 1 HAVET 15 LAND  | <ul> <li>Key focus areas:</li> <li>Greenhouse gas emissions</li> <li>Biodiversity</li> <li>Use of natural resources</li> <li>Pollution of the air, water and oceans</li> <li>Circular economy</li> </ul> |  |  |  |  |

#### KPIs and goal attainment

| КРІ    | Description   | Unit       | Goal    | Time | 2021  | 2022  | 2023    | Goal attainment |
|--------|---|------------|---------|------|-------|-------|---------|-----------------|
| KPI I1 | Greenhouse-gas emissions, own activities              | tonnes CO2 |         |      | 254,4 | 232,2 | 253,5   |                 |
| KPI 12 | Reduction in greenhouse-gas emissions, own activities | %          | 55      | 2030 | 50,4  | 54,7  | 50,6    |                 |
| KPI E3 | Energy intensity, own activities                      | kWh/m²     | 0 (NZE) | 2050 | 233   | 203   | 213     |                 |
| KPI 14 | Total greenhouse-gas emissions, Lending               | tonnes CO2 | 0 (NZE) | 2050 |       |       | 238.214 |                 |
| KPI 15 | Reduction in greenhouse-gas emissions, Lending        | %          | 40      | 2030 | NA    | NA    | 0 %     |                 |
| KPI 16 | Reduction in greenhouse-gas emissions, Lending        | tonnes CO2 | 238.214 | 2050 | NA    | NA    | 0       |                 |
| KPI 17 | Total greenhouse-gas emissions, Investments           | tonnes CO2 | 0 (NZE) | 2050 | NA    | NA    | NA      |                 |
| KPI 18 | Reduction in greenhouse-gas emissions, Investments    | %          | 40      | 2030 | NA    | NA    | NA      |                 |
| KPI 19 | Reduction in greenhouse-gas emissions, Investments    | tonnes CO2 | 0 (NZE) | 2050 | NA    | NA    | NA      |                 |

<sup>\*</sup> Figures for greenhouse gas emissions from investments are not provided, as work to establish a baseline is ongoing.

### 12.2 Climate

### 12.2.1 Climate – impact from own activities

Our greenhouse gas emissions and our negative impact on nature from our own activities are very limited. We follow up issues related to climate and nature through an environmental management system, and we

are Miljofyrlam Eco-Lighthouse certified, based on the head office model and the new criteria for the finance sector.

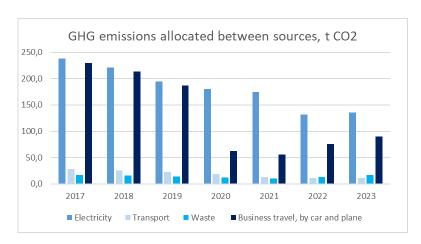

The table below shows our status and development in terms of resource consumption and greenhouse gas emissions based on the GHG protocol:

| Greenhouse-gas emissions                        | 2021   | 2022   | 2023   |
|---|--------|--------|--------|
| Greenhouse-gas emissions Scope 1, tonnes of CO  | 13,6   | 11,3   | 10,9   |
| Greenhouse-gas emissions Scope 2, tonnes of CO  | 174,8  | 131,8  | 136,0  |
| Greenhouse-gas emissions Scope 3, tonnes of CO  | 66,0   | 89,1   | 106,6  |
| Total greenhouse-gas emissions, tonnes of CO2 e | 254,4  | 232,2  | 253,5  |
| FTEs  | 597    | 601    | 621    |
| Greenhouse-gas emissions per employee           | 0,43   | 0,39   | 0,41   |
| Heated area, m <sup>2</sup>                     | 26.769 | 26.564 | 24.539 |
| Energy consumption, 1,000 kWh per year          | 6.250  | 5.384  | 5.218  |
| Energy intensity, kWh per m <sup>2</sup>        | 233    | 203    | 213    |

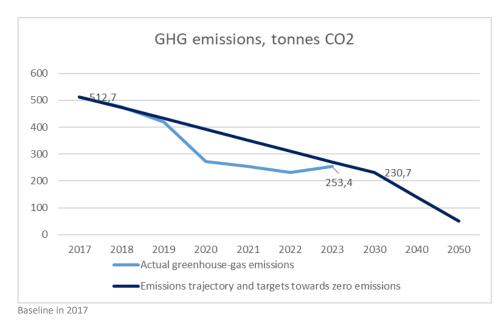

<sup>\*</sup> All subsidiaries and companies in which Sparebanken Sør has dominant ownership interests are included in the carbon accounting report.

Our greenhouse gas emissions show a marginal increase from 2022 to 2023.

#### Breakdown of greenhouse gas emissions:

Our greenhouse gas emissions are primarily related to energy consumption and travel. From 2022 to 2023, emissions associated with energy use and travel increased slightly. We have set ourselves the target of reducing our greenhouse gas emissions by 55% by 2030 and achieving net-zero emissions by 2050. The figure below shows the trend in greenhouse gas emissions, as well as an illustration of the trajectory of emissions.

Sustainability report 2023

The results show that we are close to achieving our target of reduced emissions of 55% (equivalent to 230.7 tonnes of CO2) by 2030.

For more information on the carbon accounting report, see

https://www.sor.no/felles/om-sparebanken-sor/about/social-responsibility/sustainability-reports/

### 12.2.2 Climate – impact from our business areas

We will work to help our customers, suppliers and partners reduce their impact on the climate.

We are particularly able to make the greatest influence in the following business areas:

- Lending: Increase the proportion of sustainable loans and reduce the proportion of loans with a strong negative impact on the climate. This especially applies to corporate customers.
- Investment: Increase the proportion of investments in sustainable activities and enterprises and reduce the proportion of investments in enterprises with a negative impact on the climate.
- The bank will also make use of the Green and Sustainability Bond Framework for the issuance of sustainable bonds.

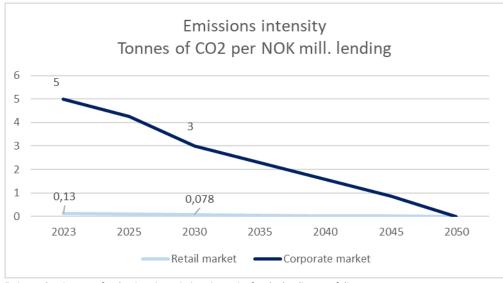

The use of technology, digitalisation and sustainable products that are closely linked to the business areas mentioned above are the key factors in our contribution to sustainable development.

Measures and guidelines for operationalising climate-related risks and opportunities in the business areas are described in more detail under the topics in this report and in the TCFD report.

For the lending portfolio, we have set a target of reducing greenhouse gas emissions by 40% by 2030, with net-zero emissions by 2050. Starting from 2022, this means an annual reduction in greenhouse gas emissions of 5% per year to achieve a reduction of 40% by 2030.

The method for measuring the reduction of greenhouse gas emissions in the lending portfolio is based on the Science-Based Target Initiative (SBTI), where we set requirements for reducing the emission intensity of the various portfolios with short and long-term goals.

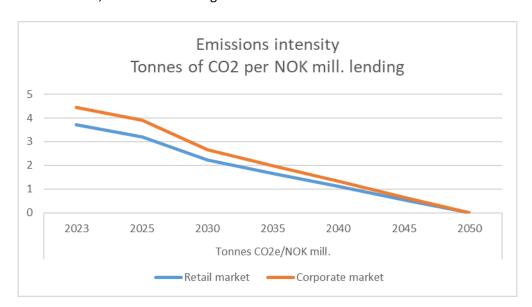

The figure below illustrates the emissions trajectory for achieving our targets:

Estimated trajectory of reductions in emissions intensity for the lending portfolio

The calculations of greenhouse gas emissions are based on guidance from Finance Norway for home mortgages, and the "sale and operation of real estate" category in the corporate market. We have used PCAF (Partnership for Carbon Accounting Financials) data and a method based on balance to calculate greenhouse gas emissions from other customers in the corporate market (see section 9.3). There is considerable uncertainty associated with establishing a correct reference point for greenhouse gas emissions (known as the baseline). The baseline in 2023 was therefore adjusted as a consequence of improvements in data and methods.

Based on the guidance from Finance Norway for mortgages and commercial real estate ("sale and operation of real estate"), we have calculated the climate intensity in kg CO2 equivalents per m2 of financed area, as shown in the figure below.

#### 12.2.3 Task Force on Climate-related Financial Disclosures (TCFD)

TCFD is a recognised method of climate reporting. Below is a brief summary of the structure and key points of the TCFD report.

Climate is not only about risk; it is also about business opportunities represented by climate-related challenges.

The main climate risks for the bank are:

#### **Transition risks:**

These are risks associated with transitioning to a zero-emission society, and involve political and regulatory aspects, technology, markets and reputation. Transition risks involve the ways in which climate-related conditions may impact our business activities.

#### **Physical risks:**

Acute risks due to extreme weather conditions leading to hurricanes, floods, etc. Chronic risks are long-term climate changes that affect temperature, sea level, etc. Physical risks involve how climate-related conditions, such as extreme weather, may impact our business activities. Climate-related risks and opportunities will affect the bank's strategy, business activities and financial development from both a short and long-term perspective.

The four main points are briefly highlighted in the table below:

| TCFD                    |  |
|-------------------------|--|
| Corporate<br>governance | The Board has determined that ESG and climate change will be prioritised areas in the strategic plan, and will operationalise these areas in the business areas. It is essential to focus on both climate-related risks and opportunities, and how these affect the business areas and the Bank's financial development. Climate risks encompass the Bank's business activities, but more importantly, climate risks affect the Bank's business model and business areas.  |
| Strategy                | Climate is not only about risk, but also about business opportunities. Major climate-related risk factors: • Risk of increased default and loss, stranded assets, increased capital requirements, and more expensive financing. • Risk of the loss of reputation and customers, and reduced market shares. Major climate-related opportunities: • Increased revenue and cost reductions through new sustainable products, digitalisation, access to new markets and industries for the circular economy, reuse etc. • Better access to, and more reasonably priced, financing and capital, and reduced capital requirements. |
| Risk<br>management      | The risk is highest in the business area of lending, where residential and commercial real estate makes up about 80 per cent of the total portfolio. The Bank has policies with requirements and exclusion criteria in these business areas. ESG with special focus on climate is integrated in credit processes BM. A framework for risk appetite and risk tolerance for ESG and climate risks is being created.  |
| Measures and methods    | Sparebanken Sør aims to reduce its own greenhouse-gas emissions by 55 per cent by 2030, and become climate neutral in accordance with the Paris Agreement by 2050. Scenario analyses will be designed to assess whether climate-related risks and opportunities are in accordance with the Bank's strategy, risk appetite and risk limits. Management goals and indicators for climate risk will be further developed on an ongoing basis.   |

In 2024, we will continue the work of operationalising and further developing the TCFD framework.

#### 12.3 Nature

#### **12.3.1** General

Nature forms the basis for livelihoods at the individual, societal and global level. It provides us with food, water, recreational areas and a sense of belonging and connection to the planet and the world around us. In addition, large parts of our economy are based on resources that nature creates and provides. Loss of nature and biodiversity would therefore have major consequences for our daily lives, the resources we depend on for survival and for value creation in the economy.

How we use nature affects the climate, while climate change affects nature. Climate and nature are closely linked. Promoting biodiversity is therefore an important part of the solution to climate challenges and a prerequisite for achieving the UN Sustainable Development Goals.

The UN Biodiversity Agreement, which was adopted on 19 December 2022, has set global goals for conserving nature, achieving sustainable management and use, and combating the causes of the loss and degradation of ecosystems.

Ecosystems have decreased in size, and the state of such systems on a global level has degraded by 47% in relation to an estimated baseline.

The global economy is dependent on well-functioning nature and ecosystems. The modern global economy affects all parts of the ecosystems. When ecosystems are degraded or – in a worst-case scenario – actually

collapse, the fundamental ecological processes may cease which, in turn, can result in significant economic risk. Around 60% of global economic growth is dependent on deliveries from these ecosystems.

According to the Intergovernmental Science-Policy Platform on Biodiversity and Ecosystem Services (IPBES), the key drivers for the loss of nature are:

|             | Drivers for loss of nature        |                                     | Ecosystem                     |                                  |  |  |  |  |
|-------------|-----------------------------------|-------------------------------------|-------------------------------|----------------------------------|--|--|--|--|
|             | Differs for 1033 of flature       | Land                                | Water                         | Sea                              |  |  |  |  |
|             | Her of annual land weeks and an   | Scope of use and reduction of       | Scope of use and reduction in | Scope of use and reduction in    |  |  |  |  |

Important instruments for reducing loss of nature are regulatory requirements, as well as reuse, sharing and circular economy. For us, this means that there must be requirements for nature in relation to lending, investments and procurement, and we must develop sustainable products in the EU taxonomy's environmental objectives, such as circular economy.

### 12.3.2Task Force on Nature-related Financial Disclosures (TNFD)

### **TNFD**

The most important business areas are Lending and Investments. Measures in relation to risks and opportunities must be operationalised in the business areas. The policy and guidelines need further developing. The most important tool is to facilitate sustainable products and services, to meet the needs of customers and society, and to reduce risk in relation to customers' impact and dependence on nature. The circular economy, reuse and sharing will be important tools for ensuring a positive impact on nature.

The Board has defined ESG and nature as a prioritised area at a strategic level. Nature is about risk, but also about business opportunities. Important initiatives including skills enhancement, dialogue and cooperation with customers, suppliers and partners on viable solutions for reducing negative impact on nature.

Major climate-related risk factors:

- 1: Risk of increased defaults and losses, increased capital requirements, and more expensive financing due to dependence and impact on nature.
- 2: Risk of loss of reputation and reduced market shares and earnings due to the failure to adapt to the green transition.

Major climate-related opportunities:

- 1: Increased earnings from sustainable products.
- 2: Improved access to, and more reasonably priced, financing and equity, and reduced capital requirements for sustainable activity (EU taxonomy).
- 3: Lower risk in portfolios.

Risk managemen

**Fargets** and methods

The most important nature-related risks are land use, the use of natural resources and climate change. The risk is greatest in the Lending business area in agriculture, real estate and construction, which accounts for approximately 80% of the total portfolio. Climate-related risks in the business areas of investments and financing are also significant. In particular, this applies to access to and the price of financing through sustainable products.

The bank has policies containing requirements and exclusion criteria for these business areas. The bank has also integrated an ESG module with special focus on climate into its lending processes for BM. The bank has a framework for green loans and bonds. Work will continue on establishing risk frameworks and general governance goals for ESG and climate risk integrated into our risk management framework.

Nature is a relatively new and complex field of study. The bank will establish sustainable products within the relevant environmental objectives and activities in accordance with the EU taxonomy.

Furthermore, through processes associated with CSRD, the bank will continue to work on how it intends to integrate nature into its business areas.

Measures, risk frameworks, KPIs and governance goals for nature-related risks must be integrated into the bank's framework and reporting.

Our TNFD report contains more details about how nature affects our business areas, see https://www.sor.no/felles/om-sparebanken-sor/about/social-responsibility/sustainability-reports/ In 2024, we will continue the work of operationalising and further developing the TNFD framework.

### 13 APPENDIX 1: GRI Index

|           | Indicator  | Description   | Source  |

| 2-10 | Nomination and selection of the highest governance body a. describe the nomination and selection processes for the highest governance body and its committees; b. describe the criteria used for nominating and selecting highest governance body members, including whether and how the following are taken into consideration: i. views of stakeholders (including shareholders); ii. diversity; iii. idversity; iii. independence; iv. competencies relevant to the impacts of the organisation.  | b. iv. When assessing the Board's competence, emphasis is placed on the Board having overall complementary expertise that covers all key aspects of the Group's activities and geography.  | a., b., b. i., https://www.sor.no/globalassets/ organisasjon/vedtekter- sparebanken-sor.pdf b. ii. https://www.sor.no/globalassets/ organisasjon/barekraft/board- diversity-policy-sparebanken- sor.pdf b. iii. Annual report 2023   |
| 2-11 | Chair of the highest governance body a. report whether the chair of the highest governance body is also a senior executive in the organisation; b. if the chair is also a senior executive, explain their function within the organisation's management, the reasons for this arrangement, and how conflicts of interest are prevented and mitigated.  | a. The Chair of the highest governance body (Chair Knut Sætre) is not the same person as the CEO (Geir Bergskaug) b. Not relevant  | a. https://www.sor.no/felles/om-<br>sparebanken-sor/styre-ledelse-og-<br>organisasjon/   |

| 2-12 | Role of the highest governance body in overseeing the management of impacts.  a. describe the role of the highest governance body and of senior executives in developing, approving, and updating the organisation's purpose, value or mission statements, strategies, policies, and goals related to sustainable development;  b. describe the role of the highest governance body in overseeing the organisation's due diligence and other processes to identify and manage the organisation's impacts on the economy, environment, and people, including:  i. whether and how the highest governance body engages with stakeholders to support these processes;  ii. how the highest governance body considers the outcomes of these processes;  c. describe the role of the highest governance body in reviewing the effectiveness of the organisation's processes as described in b, and report the frequency of this review. | a. The Board and Group Management are responsible for Sparebanken Sør's governing documents and goals, as well as for operationalising and supervising the bank's sustainability strategies. b. The Board and Group Management are responsible for identifying and managing the Group's impact on ESG areas, including engagement with stakeholders. i. The Board considers and approves stakeholder mapping and material topics. In addition, the Board and Group Management have dialogue with multiple stakeholder groups, but there are no fixed agendas or meeting places. ii. Mapping stakeholders' views is important in connection with the choice of material topics. c. Status and development are followed up through various Board matters as well as quarterly risk reports, the annual Sustainability Report, as well as an annual audit of governing documents. | a., b. https://www.sor.no/globalassets/ organisasjon/barekraft/sustainabil ity-strategy-sparebanken-sor.pdf, Section 3, page 6   |
|------|--|--|--|
| 2-13 | Delegation of responsibility for managing impacts.  a. describe how the highest governance body delegates responsibility for managing the organisation's impacts on the economy, environment, and people, including: i. whether it has appointed any senior executives with responsibility for the management of impacts; ii. whether it has delegated responsibility for the management of impacts to other employees; b. describe the process and frequency for senior executives or other employees to report back to the highest governance body on the management of the organisation's impacts on the economy, environment, and people.  |  | a.<br>https://www.sor.no/globalassets/<br>organisasjon/barekraft/sustainabil<br>ity-strategy-sparebanken-sor.pdf,<br>page 6  |
| 2-14 | Role of the highest governance body in sustainability reporting.  a. report whether the highest governance body is responsible for reviewing and approving the reported information, including the organisation's material topics, and if so, describe the process for reviewing and approving the information;  b. if the highest governance body is not responsible for reviewing and approving the reported information, including the organisation's material topics, explain the reason for this.   | a. The Board is responsible for approving the Risk Report and Sustainability Report, including material topics. The process is as follows: the CEO makes recommendations to the Risk Committee, which provides a recommendation to the Board as approver. b. not applicable  |  |
| 2-15 | Conflict of interests.  a. describe the processes for the highest governance body to ensure that conflicts of interest are prevented and mitigated;  b. report whether conflicts of interest are disclosed to stakeholders, including, at a minimum, conflicts of interest relating to:i. cross-board membership;  ii. cross-shareholding with suppliers and other stakeholders;  iii. existence of controlling shareholders;  iv. related parties, their relationships, transactions, and outstanding balances.   | Conflicts of interest are handled by the Corporate Staff Division via HR. HR's goal is to detect and map conflicts of interest, as well as manage these and where applicable implement measures to eliminate, reduce or minimise conflicts of interest. b. i., ii., iii., iv. HR is responsible for following up conflicts of interest and considering how these should be reported and handled on a case-by-case basis. For reasons of confidentiality, any involvement and reporting must be assessed on an ongoing basis. There were four cases of conflicts of interest in 2023, which were minor and which were resolved.   | a.<br>https://www.sor.no/globalassets/<br>organisasjon/barekraft/conflict-of-<br>interest-document-sparebanken-<br>sor.pdf   |
| 2-16 | Communication of critical concerns.  a. describe whether and how critical concerns are communicated to the highest governance body;  b. report the total number and the nature of critical concerns that were communicated to the highest governance body during the reporting period.   | a. Critical concerns in the form of complaints and external and internal notifications are reported to the Board in the quarterly Risk Report.     b. There were no reports of concerns of a critical nature.  | a. https://www.sor.no/globalassets/ organisasjon/barekraft/customer- complaints-procedure- sparebanken-sor.pdf https://www.sor.no/globalassets/ organisasjon/barekraft/external- whistleblowing-procedure- sparebanken-sor.pdf https://www.sor.no/globalassets/ organisasjon/barekraft/internal- whistleblowing-procedure- sparebanken-sor.pdf |
| 2-17 | Collective knowledge of the highest governance body.  a. report measures taken to advance the collective knowledge, skills, and experience of the highest governance body on sustainable development.  | a. Review of various sustainability topics, policy documents etc. in Board meetings. Board meetings with sustainability topics on the agenda.  |  |

|   |         | Evaluation of the performance of the highest governance body.  a. describe the processes for evaluating the performance of the highest governance body in overseeing the management of the organisation's impacts on the economy, environment, and people;  b. report whether the evaluations are independent or not, and the frequency of the evaluations;  c. describe actions taken in response to the evaluations, including changes to the composition of the highest governance body and organisational practices.  | a. The Board has an annual self-evaluation including competence mapping, which also includes a self-evaluation related to sustainability b. The reporting is a self-evaluation that is carried out annually c. No special measures or changes in the composition of the highest governing body or the organisation's practices have been implemented as a result of the evaluations.   |  |
|---|---------|---|--|--|
|   |         | Remuneration policies. a. describe the remuneration policies for members of the highest governance body and senior executives, including: i. fixed pay and variable pay; ii. sign-on bonuses or recruitment incentive payments; iii. termination payments; iv. clawbacks; v. retirement benefits; b. describe how the remuneration policies for members of the highest governance body and senior executives relate to their objectives and performance in relation to the management of the organisation's impacts on the economy, environment, and people.  | a. i. There is only a fixed salary and bonus scheme, no variable salaries ii. No signing bonus agreements iii. No severance agreements iv. No guidelines about clawbacks v. All employees have a collective defined contribution pension for wages up to 12 G b. Bonuses are influenced by financial performance. There is no link between salaries and remuneration, and the environment and society  | a.<br>https://www.sor.no/globalassets/<br>organisasjon/barekraft/remunerat<br>ion-policy-sparebanken-sor.pdf<br>a. i. Annual Report 2023 |
|   |         | Process to determine remuneration.  a. describe the process for designing its remuneration policies and for determining remuneration, including:  i. whether independent highest governance body members or an independent remuneration committee oversees the process for determining remuneration;  ii. how the views of stakeholders (including shareholders) regarding remuneration are sought and taken into consideration;  iii. whether remuneration consultants are involved in determining remuneration and, if so, whether they are independent of the organisation, its highest governance body and senior executives;  b. report the results of votes of stakeholders (including shareholders) on remuneration policies and proposals, if applicable. | a. Guidelines for determining salary and other remuneration to senior executives as well as the Bonus Programme are approved by the Bank's Board of Directors. i. Sparebanken Sør has its own remuneration committee ii. The guidelines for remuneration have been drawn up by the Board of Sparebanken Sør. The guidelines have been adopted by the Board of Trustees. Owners of equity certificates and employees are represented on the Board of Directors and the Board of Trustees. iii. Consultants are not involved in the formulation of payroll and remuneration policy b. N/A  | a. i.<br>https://www.sor.no/felles/om-<br>sparebanken-sor/styre-ledelse-og-<br>organisasjon/<br>Annual report 2023                       |
| , |         | Annual total compensation ratio.  a. report the ratio of the annual total compensation for the organisation's highest-paid individual to the median annual total compensation for all employees (excluding the highest-paid individual);  b. report the ratio of the percentage increase in annual total compensation for the organisation's highest-paid individual to the median percentage increase in annual total compensation for all employees (excluding the highest-paid individual);  c. report contextual information necessary to understand the data and how the data has been compiled.   | a. The ratio of the annual compensation for the highest-paid person in the bank to the median salary in the bank is 5.89 b. The salary growth of the highest-paid person was 36%, while the median salary increase in the bank was 5.9%, i.e. the highest-paid person received 610% of the salary increase in relation to the median in the bank c. Indicators of salaries are based on the following data: - Fixed salary, i.e. excluding bonus - Salaries of part-time employees are taken into account in the calculations - Salaries of temporary workers are not taken into account in the calculations   |  |

|---|-----------|--|
| SOCIAL CONDITIONS   |           |  |
| Percentage of female managers by position                   |           |  |
| Percentage of female managers in total                      |           | Number of female managers at Management Levels 1 to 4 (CEO, Group Management, Management Teams Divisions, Bank Manager and Asst Bank Manager) in relation to the total number of managers at Levels 1 to 4   |
| Women's pay compared to men's                               |           | Ü  |
| Women's pay compared to men's                               | NOK       | Average fixed salary for female permanent employees compared to average fixed salary for male permanent employees  |
| Working environment   |           |  |
| Employee satisfaction                                       | Score     | Score based on employee satisfaction in Kantar's survey, where 100 points is the top score   |
| DATA PROTECTION AND INFORMATION SECURITY                    | <u> </u>  |  |
| Uptime customer solutions, SLA                              | %         | Availability of the customer-oriented online banking services "Nettbank" (Online bank), "Mobilbank" (Mobile bank) and "Nettbedrift" (Online business), measured as the number of minutes of uptime in relation to the number of minutes per day, in accordance with defined opening hours in SLAs (Service Level Agreements) |
| Serious digital fraud cases against the bank (hacking etc.) | Number    | Fraud cases against the bank of a digital nature that have resulted in significant costs or harm to the bank   |
| CORPORATE GOVERNANCE  |           |  |
| SOCIETY   |           |  |
| Donations and sponsorships to the local community           | NOK mill. | Donations and sponsorships to the local community paid out in year of audit  |
| RESPONSIBLE BUSINESS ACTIVITIES                             |           | -  |
| Customer satisfaction, retail market                        | %         | Rank on EPSI Rating's annual survey of customer satisfaction in the banking industry. The survey gives a total score on customer satisfaction, where 100 is the best score, and scores provide a basis for ranking the banks participating in the survey   |
| Customer satisfaction, corporate market                     | %         | Rank on EPSI Rating's annual survey of customer satisfaction in the banking industry. The survey gives a total score on customer satisfaction, where 100 is the best score, and scores provide a basis for ranking the banks participating in the survey   |
| ESG Rating Sustainalytics                                   | Points    | ESG risk according to Sustainalytics' rating scale for ESG risk (sustainability). Limits for risk categories, cf. Sustainability report, Section 1.3.8   |
| RESPONSIBLE CREDIT  |           |  |
| Green home mortgages, percentage                            | %         | Percentage of green home mortgages (balance) according to the allocation reprort aand the bank's Green & Sustainability Bond Framework in % of total home mortgages  |
| Green loans for commercial real estate, percentage          | %         | Percentage of green loans for commercial real estate (balance) according to the bank's Green & Sustainability Bond Framework in % of total loans for commercial real estate  |

| RESPONSIBLE INVESTMENT AND FINANCING                                      |            |  |
|---|------------|--|
| Sustainable bonds (issued)  | NOK mill.  | Value of sustainable bonds issued in accordance with allocation report and the bank's framework for bonds, see Green & Sustainability Bond Framework   |
| Sustainable bonds, liquidity portfolio                                    | NOK mill.  | Market value of bonds in the liquidity portfolio that satisfy requirements for green bonds as defined in the bank's financial document. This means that the bond must be 1) Defined as a green bond 2) Marketed as a green bond 3) Covered bond LCR 1&2 or 0 weights in LCR 1a, and 4) Second-party opinion. The liquidity portfolio is the liquidity that banks are required by the authorities to hold for liquidity reasons |
| Percentage of policy breaches, own investments                            | NOK mill.  | Violation of the bank's Policy for responsible investments and responsible securities trading  |
| Percentage of policy breaches, liquidity portfolio                        | NOK mill.  | As for investments   |
| Percentage of policy breaches, fund managers                              | NOK mill.  | As for investments   |
| RESPONSIBLE PROCUREMENT   |            |  |
| Total procurement suppliers > NOK 1 mill.                                 | NOK mill.  | Total procurements from a supplier in the year of audit  |
| Total procurement suppliers > NOK 1 mill.                                 | %          | Total procurements from all suppliers with purchases larger than NOK 1 million in % of the bank's total procurements   |
| Proportion of suppliers who have been risk-assessed in terms of ESG       | % volume   | Share of suppliers who have been risk-assessed in terms of ESG according to the bank's system for risk assessment, measured in purchase volume in the year of audit from suppliers who have been risk-assessed, in % of the bank's total purchases   |
| Suppliers > 1 MNOK who have reported violations of labor and human rights | Number     | Number of suppliers with deliveries > 1 million, who have responded to the survey, and who themselves report that they or their subcontractors are/have been in breach of labor and human rights in accordance with the bank's Responsible Procurement Policy  |
| CLIMATE AND NATURE  |            | Responsible Procurement Policy   |
| Greenhouse-gas emissions, own activities (Baseline 2017)                  | tonnes CO2 | Total greenhouse-gas emissions in CO2 equivalents Scope 1–3 from own activities (i.e. not including Scope 3 from Lending and Investments), in line with the climate accounts prepared in accordance with the GHG protocol  |
| Reduction in greenhouse-gas emissions, own activities                     | %          | Reduction in greenhouse-gas emissions Scope 1–3 from own activities (i.e. not including Scope 3 from Lending and Investments), in accordance with the GHG protocol in relation to the 2017 baseline  |
| Reduction in greenhouse-gas emissions, Lending                            | %          | Ambition to reduce greenhouse-gas emissions Scope 1–2 included in the bank's climate accounts from Lending (i.e. not including Scope 3), based on methods and data used by the bank, measured in relation to the established baseline. The goal is to establish a baseline in 2022, based on data as at 31 December 2021   |
| Reduction in greenhouse-gas emissions, Investments                        | %          | Ambition to reduce greenhouse-gas emissions Scope 1–2 included in the bank's climate accounts from Investments (i.e. not including Scope 3), based on methods and data used by the bank, measured in relation to the established baseline.   |
| Energy intensity  | kWh/m²     | This indicator is an expression of energy intensity, i.e. consumption of energy in kWh per m² heated area  |
| Electric power from renewable energy sources                              | %          | Renewable energy sources are defined as electric power with guarantees of origin   |

# 15 APPENDIX 3: ARP action plan (2021–2024)

| Area                | Description of measures  | Purpose of measures   | Goal of<br>measures  | Status           | Responsible<br>for<br>implementa<br>tion | Long-term results  |
|---------------------|--|---|--|------------------|--|--|
| Embedding           | Equality and diversity  recertification as a topic at management and employee gatherings. Regular information on intranet/Workplace throughout the year. | Raise awareness of the bank's work on equality and diversity among bank employees. Create a better understanding and culture for equality and diversity in the organisation (at all levels). Employees are not sufficiently aware of the Bank's work on equality and diversity. | Generate pride in the organisation – attractive workplace. Good reputation.                          | Adopted<br>by KL | HR Manager                               | No employees have indicated discrimination in the employee survey. Low turnover (less than x%). High degree of satisfaction in the employee survey (better than industry average). |
| Embedding           | New topics for equality and diversity are included in the employee survey (questions on harassment and discrimination are already present).              | Raise awareness of the bank's work on equality and diversity among bank employees. Create a better understanding and culture for equality and diversity in the organisation (at all levels). Employees are not sufficiently aware of the Bank's work on equality and diversity. | Generate pride in the organisation – attractive workplace. Good reputation.                          | Adopted<br>by KL | HR Manager                               | No employees have indicated discrimination in the employee survey. Low turnover (less than x%). High degree of satisfaction in the employee survey (better than industry average). |
| Embedding           | Include equality and diversity as topics in the form used for performance appraisals.  | Raise awareness of the bank's work on equality and diversity among bank employees. Create a better understanding and culture for equality and diversity in the organisation (at all levels). Employees are not sufficiently aware of the Bank's work on equality and diversity. | Generate pride in the organisation – attractive workplace. Good reputation.                          | Adopted<br>by KL | HR Manager                               | No employees have indicated discrimination in the employee survey. Low turnover (less than x%). High degree of satisfaction in the employee survey (better than industry average). |
| Inclusive workplace | Consider using Quiz<br>from LDO at<br>department meetings<br>in the Bank, or<br>purchase/develop<br>NanoLearning on the<br>subject.                      | In the 2022 employee survey, none of the employees stated that they had been subject to bullying or harassment.   | Prevent<br>bullying,<br>harassment<br>and<br>exclusion.<br>Develop good<br>attitudes and<br>culture. | Adopted<br>by KL | HR Manager                               | No employees have indicated bullying, harassment or exclusion in the employee survey; no notifications of harassment.  |
| Inclusive workplace | A risk assessment of<br>harassment, sexual<br>harassment and<br>exclusion at work will<br>be conducted.  | In the 2022 employee survey, none of the employees stated that they had been subject to bullying or harassment. Does the situation with working from home involve a greater risk of exclusion?  | Prevent<br>bullying,<br>harassment<br>and<br>exclusion.<br>Develop good<br>attitudes and<br>culture. | Adopted<br>by KL | Gender<br>Equality<br>Committee          | No employees have indicated bullying, harassment or exclusion in the employee survey; no notifications of harassment.  |
| Recruitment         | Awareness and special attention to diversity during recruitments to management positions in divisions where one gender is under-represented.             | Women are under-represented in management positions in all divisions, apart from the PM division.   | The proportion of women in management positions at the Bank should be increased.                     | Adopted<br>by KL | HR Manager                               | The percentage of women in management positions should be at least 40% by 2026.  |

| Area                 | Description of measures   | Purpose of measures   | Goal of<br>measures  | Status           | Responsible<br>for<br>implementa<br>tion | Long-term results  |
|----------------------|---|---|--|------------------|--|--|
| Recruitment          | Develop an image<br>database for use in<br>job adverts that<br>reflects diversity.  | The Bank wishes to signal diversity through a conscious use of images.  | Greater<br>diversity.  | Adopted<br>by KL | MR/Marketi<br>ng Manager                 | Greater diversity.   |
| Recruitment          | Prepare standard<br>texts for use in job<br>adverts.  | Research shows that women and men perceive the wording in job adverts differently.  | More women<br>as applicants<br>for<br>management<br>positions and<br>IT positions.   | Adopted<br>by KL | HR Manager                               | Greater diversity among qualified applicants to job adverts.   |
| Recruitment          | Bank to individuals   | The Bank has a low proportion of employees from different ethnic backgrounds. The Bank has generally recruited a number of employees from among individuals who were employed in temporary positions. | The proportion of employees with different ethnicities should reflect the proportion in the customer base.   | ,                | HR Manager                               | Increased diversity<br>among employees; at<br>least 10 new employees<br>with an ethnicity other<br>than Norwegian by 2026. |
| Recruitment          | Offer summer jobs /<br>temp jobs and<br>internships to people<br>with different<br>ethnicities.                               | The Bank has a low percentage of employees from different ethnic backgrounds. The Bank has generally recruited a number of employees from among individuals who were employed in temporary positions. | The proportion of employees with different ethnicities should reflect the proportion in the customer base.   | Adopted<br>by KL | HR Manager                               | Increased diversity<br>among employees; at<br>least 10 new employees<br>with an ethnicity other<br>than Norwegian by 2026. |
| Facilitation         | _   | Become a responsible corporate citizen – part of the Bank's sustainability efforts.   | pase.  | Adopted<br>by KL | HR Manager                               | The Bank should accept people for work training each year.   |
| Full-time<br>culture |   | Part-time employees may be entitled to an increased position percentage when there is a need for more staff.  | Reduce the number of part-time positions.  | Adopted<br>by KL | HR Manager                               | Maintain a strong full-<br>time culture.   |
| Life phase           | Offer working from<br>home solutions for<br>employees with care<br>responsibilities.  | Facilitate options for employees with care responsibilities to combine work and family/private life.  | Increase the number of full-time positions at the Bank.  | Adopted<br>by KL | HR<br>Manager/<br>managers               | Maintain a strong full-<br>time culture.   |
| Life phase           | Create a procedure for follow-up of employees who are on leave, including an interview when restarting after finishing leave. | Currently, the type and method of follow-up for employees on leave is hit or miss.  | Employees on<br>leave that are<br>starting work<br>again should<br>have a good<br>overview of<br>their<br>opportunities<br>for<br>facilitation at<br>work. |                  | HR Manager                               | Equal career opportunities for men and women.  |

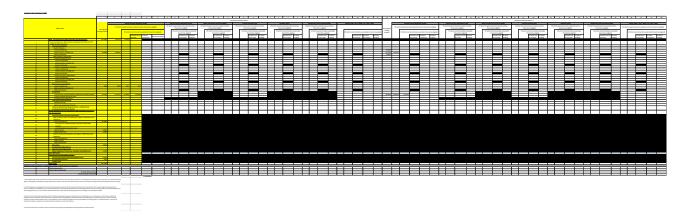

| Α | rea        | Description of measures   | Purpose of measures  | Goal of<br>measures  | Status           | Responsible<br>for<br>implementa<br>tion | Long-term results                             |
|---|------------|---|--|--|------------------|--|---|
|   | Life phase | Encourage men who wish to take a longer leave of absence than the statutory paternity leave to do so. | Men only take statutory paternity leave. The Bank would like to contribute to better equal opportunities in society.   | Men at the<br>Bank take<br>more than<br>the statutory<br>paternity<br>leave. | Adopted<br>by KL | HR<br>Manager/<br>managers               | Equal career opportunities for men and women. |
|   | Equal pay  | Introduce a regular equal pay allocation during local negotiations.                                   | Based on average wage considerations, men earn more than women in some areas and levels at the Bank. In terms of average wages at the corporate level, inequalities are generally due to the top management levels (Levels 1–3) being mostly men (70/30) and the lowest-paid job categories being mostly made up of women (80/20). | Remove any   | Adopted<br>by KL | KL/<br>Recruitment<br>committee          | More equal pay between women and men.         |
|   | Equal pay  | Assess the different positions in staff environments based on the perspective of equal pay for equal  | It is currently difficult to assess positions from an equal-pay perspective. Different job titles and professional areas are difficult to compare.   | It should be easier to implement equal-pay assessments.                      | Adopted<br>by KL | HR Manager                               | Equal pay for equal work                      |
