Country in which issuer is based:	Norway

Timely principal payments

Maturity type:	Soft Bullet
Committed liquidity reserve for principal amount of all hard bullet bonds to be	
funded at least 180 days before maturity:	n/a
Committed liquidity reserve for principal amount of all soft bullet bonds to be	
funded at least 180 days before initial maturity:	No

(note 1) The data reported in this PO is based on information provided by the issuer and may include certain assumptions made by Moody's. Moody's accepts no responsibility for the information provided to it and, whilst it believes the assumptions it has made are reasonable, cannot

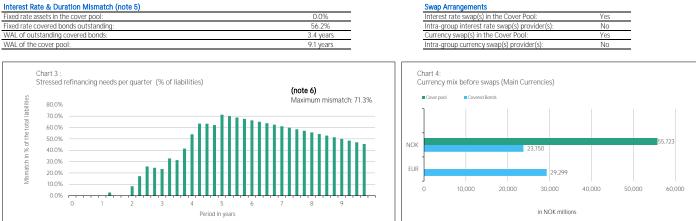

(note i) the data reported in this PO is based on information provided by the issuer and may include certain assumptions made by Moody's Accepts to responsibility for the information provided to it and, whils it believes the assumptions it has made are reasonable, cannot guarantee that they are ownil remain accurate. Although Moody's necessary second are reasonable, cannot available on request. Credit ratings, TPI and TPI Leeway shown in this PO are as of publication data. (note 2) This assumes the Covered Bonds rating is not constrained by the TPI Also to the extent rating assumptions change following a downgrade or an upgrade of the Issuer, the necessary OC stated here may also change. This is especially significant in the case of CR assessments of A3(cr) or Baa1(cr), as the necessary OC following a 1 notch downgrade may then be substantially higher than the amount suggested here as market risks are considered more critically by Moody's at this time. In any event, the necessary OC calculated to be consistent with the current rating under Moody's expected loss model. However, the level of OC consistent with a given rating level may differ from this amount where ratings are capped under the TPI framework and, for example, where committee determines under from this amount where ratings are capped under the TPI framework and, for example, where

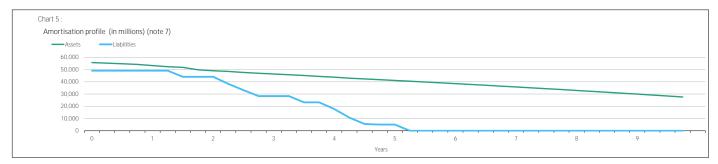

(note 3) must be minimum of catalates to be consistent with the current rating since involves, the event of catalates to be consistent with a given rating severing since involves, the event of catalates to be consistent with a given rating severing since involves, the event of catalates to be consistent with a given rating since involves, the event of catalates to be consistent with a given rating since involves, the event of catalates to be consistent with the current rating is the minimum level of over-collateralisation which is necessary to support the covered bond rating at its current level on the basis of the pool as per the cut-off date. The sensitivity run is an assumptions, including that the Covered bond rating is the minimum value of available with the current rating given rating is not consistent with the current rating size is available at a rating is not consistent with the current rating size is available at a seased on certain assumptions. Including that the covered bond rating is the minimum value of available at a seased on certain assumptions. The maximum value of available at a seased on certain assumptions and the maximum value of available at a seased on certain assumptions. The maximum value of available at a seased on certain assumptions and may change as an issue is downgraded, and as a result the actual OC number consistent with the current rating may be higher than shown. The OC required may also differ from the model output in situations when committee discretion is applied. In any event, the OC amounts stated here are subject to change at any time at Moody's discretion.
