Future prospects

Macro

Following the necessary measures taken by the Authorities to combat the Covid 19 epidemic, the Norwegian economy was hit negatively by lower international economic growth and falling oil prices. The Norwegian economy has to a certain extent improved in the 2nd and 3rd quarter, and the financial markets have normalized. Following the cut in the Norwegian policy rate to 0 %, mortgage rates have been reduced. As a consequence, house prices have developed positively and private consumption has improved.

Capital requirements

Sparebanken Sør Boligkreditt AS has a common equity tier 1 capital ratio of 16.4 percent and leverage ratio of 5.4 percent. Along with a positive profit from ordinary operations, the opportunities for further loan growth are positive.

Funding and liquidity

The Group is well positioned to establish long-term funding from the Norwegian and the international financial market.

Sparebanken Sør Boligkreditt AS

Sparebanken Sør Boligkreditt AS will further acquire mortgages from the parent bank to issue public covered bonds in Norway and abroad, primarily as benchmark issuances that are eligible to LCR requirements for level 1 assets.
